SUMMARY OF INDUSTRY

Healthcare has become one of India’s largest sector, both in terms of revenue and employment. Healthcare comprises hospitals, medical devices, clinical trials, outsourcing, telemedicine, medical tourism, health insurance and medical equipment. The Indian healthcare sector is growing at a brisk pace due to its strengthening coverage, services and increasing expenditure by public as well private players.

Indian healthcare delivery system is categorized into two major components public and private. The Government, i.e., public healthcare system, comprises limited secondary and tertiary care institutions in key cities and focuses on providing basic healthcare facilities in the form of primary healthcare centres (PHCs) in rural areas. The private sector provides majority of secondary, tertiary, and quaternary care institutions with major concentration in metros and tier I and tier II cities.

India's competitive advantage lies in its large pool of well-trained medical professionals. India is also cost competitive compared to its peers in Asia and Western countries. The cost of surgery in India is about one-tenth of that in the US or Western Europe.

India’s healthcare industry comprises hospitals, medical devices and equipment, health insurance, clinical trials, telemedicine and medical tourism. These market segments are expected to diversify as an ageing population with a growing middle class increasingly favours preventative healthcare. Moreover, the rising proportion of lifestyle diseases caused by high cholesterol, high blood pressure, obesity, poor diet and alcohol consumption in urban areas is boosting demand for specialised care services.

SECTION - II - RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all of the information in this Prospectus, including the risks and uncertainties described below and the Financial Statements incorporated in this Prospectus, before making an investment in the Equity Shares of our Company. Any potential investor in, and subscribers of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment which in some material respects may be different from that which prevails in other countries. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the risks involved. If any or some combination of the following risks occur or if any of the risks that are currently not known or deemed to be not relevant or material now, actually occur, our business, prospects, financial condition and results of operations could suffer, the trading price of the Equity Shares could decline, and you may lose all or part of your investment. For further details, please refer to chapters titled "Business Overview" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" beginning on pages 114 and 209, respectively of this Prospectus, as well as the other financial and statistical information contained in this Prospectus. If our business, results of operations or financial condition suffers, the price of the Equity Shares and the value of your investments therein could decline.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality therein:

- *Some risks may not be material at present but may have a material impact in the near future.*
- *Some risks may not be material individually but may be found material when considered collectively.*
- *Some risks may have material impact qualitatively and not quantitatively and vice-versa.*

We have described the risks and uncertainties that our management believes are material, but these risks and uncertainties may not be the only ones we face. Additional risks and uncertainties, including those we are not aware of, or deem immaterial or irrelevant, may also result in decreased revenues, increased expenses or other events that could result in a decline in the value of the Equity Shares and may also have an adverse effect on our business. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implication of any of the risks described in this section. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in the Equity Shares.

This Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus. For further details, please refer to chapter titled "Forward-Looking Statements" beginning on page 14 of this Prospectus.

Unless otherwise indicated, all financial information included herein are based on our Financial Statements. Please refer to the section titled "Restated Financial Statement" beginning on page 179 of this Prospectus.

The Risk Factors as under for sake of better clarity and increased understanding:

BUSINESS RELATED RISK

- 1. We are highly dependent on our doctors, nurses and other healthcare professionals, as well as other key personnel and the loss of, or inability to attract or retain, such persons could adversely affect our business and results of operations***

Our performance and the execution of our growth strategy depend substantially on our ability to attract and retain leading doctors and other healthcare professionals. We compete for these personnel with other healthcare providers.

The market for doctors is highly competitive and there is a general shortage of doctors in India. The factors that doctors consider important before deciding where they will work include the level of compensation, the reputation of the hospital and its owner, the quality of the facilities, research opportunities and community relations. We may not compare favorably with other healthcare providers on these factors. Many of these healthcare professionals are well-known personalities in their fields and regions with large patient bases and referral networks, and it may be difficult to negotiate favourable terms and arrangements with them. Our performance also depends on our ability to identify, attract and retain other healthcare professionals, including nurses, to support the multi-speciality and super speciality practices at our hospital. In Particular, the worldwide nursing shortage may make it difficult for us to attract and retain nurses who may choose to pursue similar opportunities abroad and may also cause salaries and wages for nurses to rise.

If we are unable to attract or retain doctors or other medical personnel as required, we may not be able to maintain the quality of our services and we could be forced to admit fewer patients to our hospitals. We are also highly dependent on members of our senior management team to manage our current operations and meet future business challenges.

- 2. We may generate revenue from the arrangements with government sponsored health schemes, any adverse change in these regulations/government policies related to such schemes may adversely affect our business, results of operations, cash flows and prospects.***

We provide medical services under various government schemes. Government schemes are an important source of new patient registrations and revenue for us. As a result, if the applicable tariffs specified in the agreements with government payers are revised downwards, or if the extent of coverage or limits are reduced, or if the payment terms are made longer, or if the reimbursement policies are changed in the agreements with the government payers, or if the government payers terminate their agreements with us, our number of new patient registrations will decline and our revenue and profitability could be negatively affected.

- 3. Our medical professional staff consists of both employees as well as doctors on a consultancy basis. If such medical staff discontinue their association with us or are unable to provide their services at our***

hospitals for any reason or if we are unable to attract or retain such consultants/full time doctors, and other healthcare professionals, our business, results of operations and cash flows may be materially and adversely affected.

Some of our doctors do not work exclusively with us and are permitted to engage in private practice outside of our business and to work at other hospitals that may compete with us. We may require to revise the compensation packages for our doctors and paramedical staff, to retain them for their professional services, which we may not be able to do in the event when the financial conditions of our hospital are adversely affected. In such cases, there is no assurance that our medical staff will continue to provide services to us or devote the whole of their time to our hospitals. We may, as a result, be unable to effectively utilize their time and expertise in providing services to our patients. These arrangements may also give rise to conflicts of interest, including with regard to how these doctors allocate their time and other resources between our hospitals and other clinics or hospitals at which they work and where doctors refer patients. Such conflicts may prevent us from providing a high quality of service at our hospitals and adversely affect the level of our patient intake which may have an impact on our business, results of operations and cash flows.

4. Delay in receipt of payment from our patients / customers may affect our cash flows, which may, in turn affect our financial condition and results of operations.

Our patients either pay for their medical expenses by themselves, through third party payers or through some other credit arrangements. Such third party payers include central, state and local government bodies, private and public insurers, and corporate entities that pay for medical expenses of their employees. Agreements with third party payers typically specify the services covered, the approved tariffs for each of the services and the terms of payment. Our revenue received through such third-party payers constitutes a key component of our total revenue from operations. We are dependent on the timely payment of outstanding dues by such third-party payers and we suffer from recurring time lapses in recovering our fees and costs incurred from such third-party payers. Some patients who may pay the hospital fees in various instalments, in such case of partial payments we may not be able to collect their remaining payments/instalments in a timely manner or not at all.

5. We face intense competition from other healthcare service providers. If we are unable to compete effectively, our business, results of operations and cash flows may be materially and adversely affected.

We operate in a competitive environment. In most markets, we compete with hospitals, clinics, diagnostic chains and dispensaries of varying sizes with different specialties. We compete on the basis of factors such as our specialty and other service offerings, quality and selection of healthcare professionals, affordability, quality of care, technology, quality of facilities, patient satisfaction, brand and reputation. Our pharmacies in our hospitals compete on factors such as price and product offerings. Some of our multi-specialty competitors offer services that we do not offer. Some of our competitors are owned or operated by governmental bodies or by private not-for-profit entities supported by endowments and charitable contributions, which can finance capital expenditures without incurring significant tax obligations. We may also face competition from new market entrants, healthcare companies which may enter the Indian market in the future.

6. The impact of the COVID-19 pandemic on our business and operations is uncertain and cannot be predicted.

An outbreak of a novel strain of coronavirus disease 19 (“COVID-19”), was recognized as a pandemic by the World Health Organization, on March 11, 2020. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown beginning March 25, 2020. The lockdown lasted until May 31, 2020, and has been extended periodically by varying degrees by state governments and local administrations. In response to the COVID-19 outbreak, the governments of India and many other countries have taken preventive and protective actions, such as imposing countrywide lockdowns, restrictions on travel and business operations and advising or requiring individuals to limit their time outside their homes. Temporary closures of businesses had been ordered and numerous other businesses have been temporarily

closed voluntarily. We have monitored and considered the impact of known events arising from the COVID-19 pandemic including with respect to our liquidity and going concern, recoverable values of property, plant and equipment, goodwill, intangible assets, trade receivables and the net realisable value of other assets. As the outbreak continues to evolve, we will continue to closely monitor the impact that COVID-19 may have on our Company, including any material changes to future economic condition, liquidity and result of operations of our business and prospects. While there have been progressive relaxations and calibrated easing of lockdown measures by the Government, the full impact of the COVID-19 pandemic is still unknown and difficult to predict. Possible additional “waves” or resurgences of COVID-19 cases may result in slower economic recovery, further disruptions to businesses and the imposition of stricter or extended government lockdown policies

We may encounter additional COVID-19 related difficulties and experience, including but not limited to:

- directives or actions by governments, government authorities, local agencies and courts that affect our ability to operate our hospitals and/or the manner in which we operate our hospitals. For example, directives or actions to regulate various aspects of our operations (such as, amongst other things, prices, and mandatory bed allocation) and/or to oversee, manage or administer the provision of healthcare to COVID-19 patients;
- reluctance or unwillingness of some patients to seek healthcare services in hospitals due to their perception of an increased risk of infection when traveling to hospitals and coming into close contact with healthcare professionals;
- delay in renewing or obtaining necessary registrations, approvals, licenses and permits from statutory and regulatory bodies;
- heightened risk of COVID-19 infection to doctors, nurses and other healthcare professionals at our hospitals, which may lead to a shortage of manpower and additional labor and employment expenses;
- possible delay in our planned projects; and
- increased costs to ensure the safety of our workforce and continuity of operations while conforming to the measures implemented by various governments.

We have witnessed decline in the normal patients’ volumes; however, the decline is off-set by increase in the number of COVID-19 patients. There is no assurance that our business will not be adversely affected if the COVID-19 pandemic were to worsen or last for an extended period of time.

We have implemented safety protocols to ensure the safety and wellbeing of our healthcare professionals during the COVID-19 pandemic. We adopted digital consultation and telephone consultation as alternatives to physical visits in accordance with applicable laws and our confidentiality obligations. We provided PPE kits to healthcare team and supporting staff, distributed suitable face masks, face shields, and set up a screening team to check the body temperature and other symptoms of individuals entering our hospitals. However, we may not be able to fully mitigate the risks of our healthcare professionals contracting COVID-19 due to the fact that they are in close contact with patients on a daily basis, and we have, in the past, occasionally been required to quarantine our healthcare professionals suspected of contracting the virus. An outbreak of COVID-19 among a concentrated group of our healthcare professionals could disrupt our business and operations in the affected facilities or areas

The duration of the COVID-19 outbreak and its ultimate impact on us and the general economy cannot be predicted. The COVID-19 pandemic and its effects may last for an extended period of time, and could result in significant and continued market volatility, exchange trading suspensions and closures, declines in global and Indian financial markets, higher default rates, and a substantial economic downturn or recession. The foregoing could disrupt our operations, adversely affect our ability to establish and implement business development plans, and negatively impact our financial performance. In addition, if we do not respond appropriately to the pandemic, or if patients perceive our response to be inadequate, we could suffer damage to our reputation and our brand, which could adversely affect our business in the future

Our hospitals require authorization from the relevant state government in order to treat COVID-19 patients. The government of Gujarat have issued multiple orders, which, among others things, set the ceiling rate chargeable by private hospitals and laboratories for treatment and testing of COVID-19 patients. While we intend to comply fully with the government's orders, there can be no assurance that the government will not take action against us in the future.

The COVID-19 pandemic could also exacerbate the risks identified in this "Risk Factors" Chapter. Therefore, its impact, as well as the impact of any other infectious illness outbreaks that may arise in the future, could adversely affect our consolidated results of operations, financial position and cash flows in ways that cannot necessarily be foreseen.

7. *We have not yet entered into definitive agreements to utilize the proceeds of the Issue allocated towards funding of our inorganic growth initiatives. Any delay in finalization and execution of contracts / Agreements may have an adverse impact on our Company's operations.*

We have not entered into any definitive agreement or identified potential tie-up opportunities for which funds are proposed to be raised through this Issue. The quotations obtained by us in connection with the object as described in "Objects of the Offer" on page 79 of the Prospectus, are subject to change in the light of various factors beyond our control, including delays or increase in quoted prices by identified vendors. Our inability to enter in to any contract / Agreement may lead to cost overruns and may impact our future profitability.

Also, the requirement of equipments, civil works, medical devices, etc as cost towards entering into management contracts / Agreements aggregating to Rs. 2854.00 lakhs for 35 units are purely based on estimates of the management and vendor.

8. *If we are unable to maintain bed occupancy rates at sufficient levels, we may not be able to generate adequate returns on our capital expenditure, could adversely affect our operating efficiencies and our profitability*

Our ability to sustain current levels of profitability and operating efficiencies depends on our ability to maintain and increase bed occupancy rates, which in turn depends on factors such as brand recognition in the communities in which we operate, our ability to attract and retain quality healthcare professionals, our ability to develop super-specialty practices and our ability to compete effectively with other hospitals and clinics. Our average bed occupancy rate was 65.90% and 65.20% in Financial Year 2020 and Financial Year 2021 respectively. If we fail to maintain or improve our occupancy rates while we continue to incur significant capital expenditure, our business, financial condition, results of operations and prospects may be materially and adversely affected.

9. *If we are unable to keep pace with technological changes, new equipment and service introductions, changes in patients' needs and evolving industry standards, our business and financial condition may be adversely affected.*

The healthcare services industry is characterized by periodic technological changes, new equipment and service introductions, changes in patients' needs and evolving industry standards, including, for example, changes associated with diagnosis process, treatments and patient-doctor interactions in telemedicine offerings. The upgradation involves capital expenditures on the acquisitions of medical equipment's, we may not be able to recover the such capital expenditures within reasonable time. We may incur significant repair and maintenance costs and may experience disruptions in our operations in the event of any material malfunction or breakdown of our equipment in the future. In addition, we may not be able to respond to such failures or malfunctions in a timely manner or with acceptable cost, which could adversely impact our ability to provide patients with necessary treatments and quality services, result in injury of our healthcare professionals, and damage our reputation. Our continued success depends on our ability to anticipate industry trends and identify, develop and market new value-added services that meet client demands, to continually enhance our equipment and technologies in a timely and cost-effective manner. Developing new services and tools in a timely and cost-effective manner may be difficult, particularly as

market preferences can change rapidly. Our assessment of the market and evolving customer preferences may not lead to new services that are commercially successful.

Our operations are also subject to risks inherent in the use of complex medical equipment. Some equipment we use in our hospital involves radioactive substances. Failures, accidents, defects, improper use or lack of maintenance of our equipment may lead to injury of our patients and healthcare professionals.

10. Conflicts of interest may arise out of common business objects shared by our Company and our Promoters, which may affect our business, results of operations and financial conditions.

Dr. Parag Thaker, a member of Promoter Group and Non -Executive Director maintain his own private practices and may be holding positions, at other hospitals. These arrangements may give rise to conflicts of interest, including with regard to how he allocates his time and other resources between our hospitals and other hospitals or clinics which he owns or he is engaged with and where he refers patients. Such conflicts may result in reduced number of patients.

11. Our arrangements with some of our doctors may give rise to conflicts of interest and time-allocation constraints, adversely affecting our operations

Some of our doctors are not our employees. Our contracts and other arrangements with some of our visiting doctors permit them to maintain their own private practices, as well as positions, at other hospitals. Some of these doctors may also have admitting privileges at other hospitals in addition to our hospital. Certain of our senior doctors may also maintain positions at local clinics or affiliations with teaching hospitals. These arrangements may give rise to conflicts of interest, including with regard to how these doctors allocate their time and other resources between our hospitals and clinics and other hospitals or clinics at which they also work and where doctors refer patients. Such conflicts may prevent us from providing a high quality of service at our hospitals and adversely affect the level of our patient intake.

12. Lack / Limited significant experience of the Issuer or its Promoter in the industry segment for which the issue is being made.

The Promoter of the Company is Bipinchandra Shah. He possesses Bachelor of Engineering degree in Civil Engineering from Gujarat University. He has experience of more than a decade in civil engineering field. He started the hospital in the name of “Aashka” in the year 2012 and roped in medical and paramedical professional staff to provide various medical facilities to the people of Gujarat. Due to his understanding towards the business model and his vision to deliver quality and affordable healthcare services to the people, the Company has been deliver healthcare services to the people able to render integrated health care facilities to the people.

13. Our Promoter, Bipinchandra Shah is interested in the property acquired by our Company in last five (5) years

Owned by Bipinchandra Shah, Promoter of the Company situated at 39 Chaitanya Society, near Golden Triangle, Stadium Road Ahmedabad City, Navrangpura, Ahmedabad 380009, for the purpose of rent-free accommodation for the amount of Rs. 6,50,00,000 (Rupees Six Crores Fifty Lakhs only) excluding registration and other applicable charges. For more details, please refer chapters, “Our Management”, “Financial Statements” and “Risk Factors” on page nos. 159, 179 and 23 of this Prospectus.

14. Defaults in the re-payments of the loans/borrowings to the financial institution.

As per the Audited Financial Statements for the year March 31, 2019, Company had made the defaults in the repayments of the loans taken from the financial institutions/banks. The details for the said defaults are as follows:

Sr No.	Year	Loan Details
1.	2018-2019	Term Loan-1 A/c. No. 200470210000036- Bank of India.

2.	2018-2019	Term Loan-1 A/c. No. 200470210000045- Bank of India.
3.	2019-2020	Term Loan-1 A/c. No. 200470210000036- Bank of India.
4.	2019-2020	Term Loan-1 A/c. No. 200470210000045- Bank of India.

Except as disclosed above, there have been no instances of defaults or rescheduling/restructuring of borrowings with financial institutions or banks:

Our Company has made delayed payments with respect to our borrowings for certain periods including up to the year 2021. Our Company has regularized the payments to the Banks and Financial Institutions and there are no over dues as on the date of filing of the Prospectus

Also, Our Company has not approached its lenders to restructure the debts and/or rescheduling

15. We operate in a highly regulated industry, and compliance with applicable safety, health, environmental and other governmental regulations and any violations of existing regulations may adversely affect our business, results of operations and cash flows

The healthcare industry is subject to laws, rules and regulations in the regions where we conduct our business or in which we intend to expand our operations. For a description of the regulations to which we are subject, see “Key Industry Regulations and Policies” on page 143 of this Prospectus. Health and safety laws and regulations in India have become increasingly stringent over time, and it is possible that they will become more stringent in the future.

Compliance with applicable health and safety standards is time consuming, costly and requires a number of dedicated personnel. We may incur substantial costs in order to comply with such health and safety standards and other current or future laws, rules and regulations, and we may not be able to maintain, at all times, full compliance with such laws, regulations, policies and guidelines. These current or future laws, rules and regulations may also impede our operations. Any non-compliance with the applicable laws, rules and regulations may subject us to regulatory action, including penalties and other civil or criminal proceedings, which may materially and adversely affect our business, prospects and reputation. Our compliance costs may adversely affect our revenues.

The qualification and practicing activities of our healthcare professionals are strictly regulated by applicable laws, regulations, policies and guidelines, as well as by applicable codes of professional conduct or ethics. If our health professionals fail to comply with applicable laws, regulations, policies or guidelines, including professional licensing requirements, we may be subject to penalties including fines, loss of licenses or restrictions on our healthcare facilities and operations, which could materially and adversely affect our business and reputation.

16. We are dependent on a number of key personnel, including our Promoters and senior management, and the loss of or our inability to attract or retain such persons could adversely affect our business, financial condition, results of operations and cash flows.

We depend on our Promoter, Key Managerial Personnel to maintain strategic direction, manage the operations and meet the business challenges that may arise in future related to the business. The loss of, or inability to attract or retain, such persons could materially and adversely affect our business and financial results. Our Promoter, Key Managerial Personnel and Senior Management have been integral part of our Company for the development of the business. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting skilled employees that our business requires. If we are unable to hire and train replacement personnel in a timely manner or increase our levels of employee compensation to remain competitive, our business, financial results, results of operations and cash flows may be materially and adversely affected.

17. If we fail to achieve favorable pricing on medical consumables, pharmacy items, drugs, and surgical instruments from our suppliers or are unable to pass on any cost increases to our payers, and other adverse regulatory changes in the healthcare industry our profitability could be materially and adversely

affected.

Our profitability is affected by our ability to achieve favorable pricing on our medical consumables, pharmacy items and medical equipment from our suppliers, including through negotiations for supplier rebates. Because these supplier negotiations are continuous and reflect the ongoing competitive environment, the variability in timing and amount of incremental supplier discounts and rebates can affect our profitability. These supplier programs may change periodically, potentially resulting in higher cost of surgical instruments, drugs and consumables. Further, such pricing constraints can impair our continued profitability and financial condition in general. If we are unable to adopt alternative means to deliver value to our patients, our revenue and profitability may be materially and adversely affected.

18. *We rely on third party suppliers and manufacturers for our supplies and equipment. Failure of such third parties to meet their obligations could adversely affect our business, results of operations and cash flows.*

We source our equipment and supplies from third party suppliers under various arrangements. Any failure to procure equipment, reagents or drugs on a timely basis, or at all, from such third parties and on commercially suitable terms could affect our ability to provide our services. We may also be unable to find alternative service providers in time, or at all, and at a suitable cost. In some cases, we depend on the original equipment manufacturer or an even more limited pool of “authorized” service providers for equipment repair and maintenance, which exposes us to further risk of delay or higher repair and maintenance costs. Due to limited control over the suppliers, we may not be able to obtain quality products on timely basis in sufficient quantity. Further, any delay or inability to repair and maintain our equipment could cause disruptions in our operations and adversely affect our business, financial condition and cash flows. There can be no assurance that we will be able to maintain our relationships with our major suppliers. Since we do not have formal long-term arrangements with the suppliers and manufacturers our business relationship between our Company and our major suppliers may deteriorate or may terminate their business relationship with our Company. We could also experience higher costs, network healthcare provider disruptions, less attractive services for our clients and/or difficulty in meeting regulatory or accreditation requirements, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

19. *We are exposed to legal claims and regulatory actions arising from the provision of healthcare services and may be subject to liabilities arising from claims of malpractice and medical negligence which could materially and adversely affect our reputation and prospects*

Our operations involve treatment of patients with the variety of infectious diseases. People may contract serious communicable diseases during their visit at our facility centre which could result in significant claims for legal damages against us. Hence, we are exposed to the risk of legal claims and regulatory actions arising out of the medical services provided by us. From time to time, we may be subject to claims alleging, among other things, medical negligence by our healthcare professionals and product liability for medical devices we use, pharmaceuticals we dispense and medical and pharmaceutical products we sell in our pharmacies. We could also be the subject of complaints from patients who are dissatisfied with the quality and cost of healthcare services, false positive or false negative checkup results, misdiagnosis, or other acts of medical negligence. They can be attributed to various factors, such as the negligence of medical personnel, failure of medical equipment, inaccurate results of medical tests conducted by outsourced laboratories, individual patient-specific conditions and disease complications. We rely on our healthcare professionals to make proper diagnoses, administer proper treatment.

20. *The occurrence of various man-made and natural disasters at facility centre are susceptible to risks and could adversely affect our results of operations and financial conditions.*

We store, handle and use certain chemicals, such as alcohol, sanitizers, gases, fuel and other inflammable materials at some of our hospitals. Healthcare facilities are subject to risks associated with fires, power failures, telecommunications failure and other events. Such events could materially impact our business in the future. Furthermore, any short circuit of power supply for our equipment and machines including

air conditioning plants, power supplies, could result in accidents and fires that could result in injury or death to our employees, our patients, and other persons present at our hospitals. Natural disasters such as cyclones, storms, floods, earthquakes, tornadoes, fires, explosions, pandemics and man-made disasters such as terrorism, political tensions, civil unrests and other acts of violence and wars like situations in India could adversely affect our business, financial condition and results of operations.

21. *If we are unable to establish and maintain an effective internal control, our business and reputation could be adversely affected.*

We are responsible for establishing and maintaining adequate internal measures commensurate with the size and complexity of operations. Our internal audit functions make an evaluation of the adequacy and effectiveness of internal systems on an ongoing basis to ensure our operations adhere to our policies, compliance requirements and internal guidelines. We periodically test and update our internal processes and systems and there have been no past material instances of failure to maintain effective internal controls and compliance system. However, we are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems, and our actions may not be sufficient to ensure effective internal checks and balances in all circumstances. We take reasonable steps to maintain appropriate procedures for compliance and disclosure and to maintain effective internal controls over our financial reporting so that we produce reliable financial reports and prevent financial fraud.

22. *Our Company will not receive the entire proceeds from the Offer. Some of our Shareholders are selling shares in the Offer and will receive proceeds as part of the Offer for Sale.*

The Offer comprises a Fresh Issue of 54,00,000 Equity Shares aggregating up to ₹. 6534.00 lakhs by our Company and an offer for sale of 30,00,000 Equity Shares aggregating up to ₹ 3,630 lakhs by the Promoter selling Shareholders and the Selling Shareholders. The proceeds from the Offer for Sale will be paid to the Promoter selling Shareholders and the Selling Shareholders in proportion to their respective portion of their Offered Shares and our Company will not receive any such proceeds. For further details, see the section entitled “*Objects of the Offer*” and “*Capital Structure*” on pages 79 and 61 respectively.

Other than the listing fees for the Offer all cost, fees and expenses in respect of the Offer will be shared amongst our Company and the Promoter selling Shareholders and the Selling Shareholders, respectively, in proportion to the proceeds received for the Fresh Issue and their respective portion of Offered Shares, as may be applicable, upon the successful completion of the Offer.

23. *We have unsecured loans from directors and relatives of directors, which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our business operations.*

As per our restated financial statements, as on March 31, 2021 we have unsecured loan from directors and relatives of directors which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our liquidity and business operations. For further details of these unsecured loans, please refer to Chapter titled “*Restated Financial Statement*” beginning on page 179 of this Prospectus.

24. *We may lose existing industry accreditations, fail to obtain accreditations for facilities for which we have made applications, or fail to renew our accreditations if we are not able to maintain or meet evolving accreditation standards*

We our NAHB Certified Hospital, however our ability to retain our accreditations depends on the standards and protocols we are required to maintain by the accrediting body. We may also be required to progressively achieve better standards and meet stricter requirements if norms for accreditation are revised. We may not be able to meet such standards. There can be no assurance that our pending applications for accreditations will be granted. We may face reputational risk if our accreditations are either withdrawn or not renewed. Any such action may adversely affect our revenue, prospects and results of operations.

25. Our Company and certain doctors employed/hired at our facility centre may be, be involved in certain medical negligence cases, and the claims of the complainants in such cases may exceed the professional indemnity insurance cover availed by our Company.

We are exposed to the risk of alleged malpractice claims and regulatory actions arising out of medical services provided by us, including medical services provided to us. However, we do not have direct control over the clinical activities of our doctors and other healthcare staff, as their diagnoses and treatments of patients are subject to their professional judgement, and in most cases, must be performed on a real-time basis. Any incorrect clinical decisions or actions on the part of our doctors and other healthcare staff or any failure by us to properly manage their clinical activities may result in unsatisfactory treatment outcomes, patient injuries or possible patient death. Current or former patients or their families may threaten or commence litigation for medical negligence or malpractice against us. If such claims succeed, we may become liable for damages and other financial consequences and may even be exposed to criminal or civil liability, which may materially and adversely affect our reputation, financial condition and results of operations. While medical negligence cases are covered under professional indemnity insurance policies, there can be no assurance that such insurance cover would be adequate to cover compensation claims in such cases if these medical negligence cases were to be decided in favour of the claimants.

26. Most of our radiotherapy and diagnostic imaging equipment contain radioactive and nuclear materials or emit radiation during operation which could make us liable for damages.

Radioactive procedures are commonly used in medical applications. Beginning with x-rays, to scans and advanced procedures to treat malignancy, our hospitals routinely use equipment that deal with radioactive substances. We are required by various regulations promulgated under the Atomic Energy Act, 1962, and administered by the Atomic Energy Regulatory Board ("AERB"), to obtain certifications, licences and registrations for various processes and medical applications involving radioactive substances. The AERB also imposes stringent control requirements as to the use, handling and disposal of radioactive substances and procedures. A number of record maintenance requirements are also applicable to our Company. Despite precautions and compliance with regulations, the risk exists that accidents could occur during our operation of radiation generating equipment and use of radioactive material, resulting in the release of radiation or leakage of substances in a manner or to an extent unsafe for human beings or for the environment in general. Such accidents involving radioactive substances can be devastating to human life and well-being, including causing death. We may be liable for all such damage caused as a result of any accident, and may be required to compensate persons suffering injury as a result of such exposure to radiation. Such damages may materially impact our business and financial condition.

27. Our insurance coverage may not adequately protect us against certain operating hazards and this may have an adverse effect on our business. Further, our insurance premia may increase and any significant deterioration in our claims experience, may result in insurance not being available to us on acceptable terms.

Our existing insurance may not be sufficient to cover all damages, whether foreseeable or not. As a result, any successful claims against us in excess of the insurance coverage may adversely affect our business, reputation, financial condition, results of operations, cash flows and prospects. Insurance against losses of this type can be expensive and insurance premiums may increase in the near future. Insurance rates may also vary by speciality and other factors. The rising costs of insurance premiums could have a material adverse effect on our financial position and results of operations.

Additionally, although we maintain workmen's compensation insurance to cover us for costs and expenses we may incur due to radiation injuries to our employees in our workplace, including those resulting from the use of hazardous materials, this insurance may not provide adequate coverage against potential liabilities. Similarly, while we maintain fire insurance to cover us for costs and expenses arising out of damage caused by fire, there is no certainty that such insurance will be adequate to cover all liabilities that may arise on account of fire hazards at any of our hospitals.

28. We are involved in certain legal proceedings, any adverse developments related to which could

materially and adversely affect our business, reputation and cash flows.

There are outstanding legal proceedings against and initiated by us, certain Company and Promoters and Directors, which are pending at different levels of adjudication before various courts, tribunals and other authorities. Such proceedings could divert management time and attention and consume financial resources in their defence or prosecution. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and quantifiable and include amounts claimed jointly and severally from our Company and other parties. Such proceedings could divert management time and attention, and consume financial resources in their defence or prosecution. 29. We may not be able to protect our brand name and trademarks.

Our name and trademarks support our business. We believe that our reputation and brand are associated with the “AASHKA” name, and that this association has contributed towards the success of our business. We believe that our trademarks and other proprietary rights have significant value and are important to

identifying and differentiating our healthcare services from those of our competitors and creating demand for our healthcare services.

Third parties may assert intellectual property claims against us, particularly as we expand our business and the number of healthcare services we offer. Our defence of any claim, regardless of its merit, could be expensive and time consuming and could divert management resources. Successful infringement claims against us could result in significant monetary liability. In addition, resolution of claims may require us to cease using those rights altogether.

Unauthorized use of our brand name or logo by third parties could adversely affect our reputation, which could in turn adversely affect our business, financial condition and results of operations. Intellectual property rights and our ability to enforce them may be unavailable or limited in some circumstances. Loss of intellectual property may significantly affect our media and advertising activities, and loss of equity for the "AASHKA" brand, thus adversely affecting our business, revenue and prospects

Maintenance work on most equipment can be performed only by the manufacturer or a designated service provider and involves significant downtime to complete maintenance. At times, maintenance of some equipment cannot be performed at our hospitals, and may have to be moved to the location of the manufacturer or service provider, adding to the downtime. Our equipment is subject to normal wear and tear and will be in need of repairs from time to time. Some repairs may be routine in nature, involving lower downtime, and some repairs may require replacement of parts of the equipment, which may be time consuming. During such times, we may not be able to put the equipment to use. We may, as a result, suffer losses by reason of not being able to use such equipment.

31. *We may enter into private partnerships/joint ventures/ strategic alliances/third-party tie-ups with other medical facility centres to provide our extended services and achieve synergies across our businesses, replicate business models across jurisdictions and integrate and manage our operations.*

Any failure by the respective third-party facility centres to obtain and renew regulatory approvals and licences on a timely basis may potentially result in adverse action being taken against such facility centres, including potentially, cessation of operations from such facility centres. Further, we have sought to identify and achieve synergies and operational efficiencies across business verticals in the various jurisdictions in which may we operate and replicate business models. However, there can be no assurance that we will be able to achieve the synergies that we seek and generate the expected benefits. Further, we may not be able to effectively integrate our acquired businesses into our existing operations, or we may incur higher than anticipated costs, or incur unknown liabilities that could materially and adversely affect our financial condition, cash flows and results of operations.

32. *Our revenue is primarily dependent on inpatient treatments, which could decline due to a variety of factors. Any such decline will adversely affect our financial condition and results of operations.*

Our inpatient admissions and treatment contribute significantly to our revenue, compared to our outpatient consultative care. In the event there is a decline in the number of inpatients serviced by us, our financial condition and results of operations will materially stand impacted. This apart, in markets where we have an established presence, if our patients choose to avail inpatient healthcare services from our competitors, instead of availing such healthcare services from us, our growth in revenue could stand materially impaired.

34. We have experienced negative cash flows in previous years / periods. Any operating losses or negative cash flow in the future could adversely affect our results of operations and financial condition.

Our Company had negative cash flows from our Investing and Financing activities in the previous years as per the Restated Financial Statements and the same are summarized as under.

35. We have entered into certain transactions with related parties. These transactions or any future transactions with our related parties could potentially involve conflicts of interest.

We have entered into certain transactions with related parties with our Directors and their relatives and may continue to do so in future. Our Company has entered into such transactions due to easy proximity and quick execution. However, there is no assurance that we could not have obtained better and more favorable terms than from transaction with related parties. Additionally, our company belief that all our related party transactions have been conducted on an arm's length basis, but we cannot provide assurance that we could have achieved more favorable terms had such transactions been entered with third parties.

There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

61. *The healthcare industry in India is subject to various laws, rules, regulations, and procedures.*

For a description of the regulations to which we are subject, see "Key Industry Regulations and Policies" on page 143. Given our line of business and current geographical presence, we are subject to various and

extensive local laws, rules, regulations, and procedures. These include laws which govern the stocking and distribution of drugs, the minimum standards for clinical facilities and services provided by healthcare establishments, laws which govern the transplantation of human organs for therapeutic purposes, as well as laws which regulate the control and use of atomic energy in healthcare establishments. Typically, the laws which we are governed by prescribe various standards governing factors such as the quality of medical equipment and services, the adequacy of medical care offered by us, area and equipment specifications, discharge of pollutants in the air and water, handling and disposal of biomedical, radioactive and hazardous wastes, minimum qualifications of medical and support personnel, confidentiality, and maintenance and security issues associated with health-related personal, sensitive information and medical records. For instance, since we use equipment which emit radioactive substances at our hospitals, we continue to remain governed by the Atomic Energy (Radiation Protection) Rules, 2004 ("Radiation Protection Rules"). The Radiation Protection Rules inter alia, regulates the handling and operation of any radiation generating equipment, and stipulates the requirement for a permission to be obtained for such handling and operating. As per the Radiation Protection Rules, no person is permitted to establish or decommission a radiation installation, or handle or operate any radiation generating equipment, except in accordance with the terms and conditions prescribed under a license obtained in accordance with the Radiation Protection Rules. Failure to comply with the provisions of the Radiation Protection Rules entails imprisonment, which may extend to a term of five years, or fine, or both.

we are also governed by India's information technology regulatory framework which regulates the collection, storage, and dissemination of a patient's medical records and history, which are deemed to be sensitive data or information under the provisions of the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011.

In the event where a patient's medical records and / or history are negligently handled by us, we may be subject to penal action, and may also be required to pay an aggrieved patient damages in accordance with the provisions of the Information Technology Act, 2000.

62. *Malpractices by some players in the industry affect overall performance of emerging Companies.*

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like our as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

63. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

64. *Our 100% Revenue is derived from business in India and a decrease in economic growth in India could materially affect and cause our business to suffer.*

We derive 100% of our revenue from our operations in India and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

65. *Change in government policies that relate to patients covered by government schemes could impact our revenue from operations.*

We provide medical services under various government schemes. For instance, we provide healthcare services to patients under the Central Government Health Scheme, the Ex-servicemen Contributory Health Scheme, and the Employees' State Insurance Scheme. Agreements with governmental organisations such as the Central Organisation, Ex-servicemen Contributory Health Scheme, and the Additional Director of the Central Government Health Scheme, specify applicable tariffs for the medical services and the terms of payment. Resultantly, if the applicable tariffs specified in the agreements with government payers or the extent of coverage or limits is reduced, or if the reimbursement policies are changed in the agreements with the government payers, or if the government payers terminate their agreements with us, the number of new patient registrations may decline and our revenue and profitability could be adversely affected. We normally receive payments from government agencies within 30 – 45 days, however, we have experienced delays in receiving these payments occasionally due to reasons not attributable to us. Further, some of our hospitals may, in the future, be required to provide free or subsidised medical services and consumables to patients belonging to economically disadvantaged sections of the society, and certain other classes of patients. This may materially and adversely impact our financial condition, cash flows, and results of operations.

OTHER RISKS:

66. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

67. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

68. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

69. *Adverse developments in the global or local macroeconomic environment may adversely affect our business and results of operations.*

Our business and financial performance are affected by global and local economic conditions. Our

Company's performance is significantly influenced by the economic situation and governmental policies in India. A slowdown in global economic growth or in economic growth in India (including as a result of the COVID-19 pandemic) could exert downward pressure on the demand for our products which could have an adverse effect on our business, cash flows, financial condition and results of operations. Further, a prolonged weakness in the global and domestic Indian financial and economic situation may have a negative impact on third parties with whom we do, or may do, business.

2. Funding of our inorganic growth initiatives

To cater to India's growing healthcare needs coupled with our Company's plans to expand its footprints, we plan to expand inorganically in our hospital business to increase our bed base from 200 to more than 1000 beds by FY 2024. Through this, our Company will leverage its experience and expertise to enhance the range and quality of healthcare services being provided at the hospitals.

Our Company is looking for opportunities to expand in Tier – II and Tier III – city / district in the state of Gujarat, India by entering into management contracts and / or strategic tie-ups with hospitals, nursing home, care units, etc. ("associate hospitals"). Some of the selection criteria that we may consider when evaluating strategic acquisitions includes inter alia:

- 1) Hospitals with a minimum bed size of 20 beds
- 2) Hospital managed / owned by a general physician / surgeon
- 3) Focusing on primary healthcare
- 4) Located in a tier I, tier II city / district in the state of Gujarat, India.

Our Company proposes to utilize up to Rs 2,854 lakhs out of the Net Proceeds towards our inorganic growth initiatives. The expenditure will be incurred towards modernization of the infrastructure and

upgradation of the proposed associate hospitals through purchase of medical devices and modern equipment.

These arrangements will benefit both our Company and the associate hospitals on account of our strong brand building (Aashka), training, consolidating & managing non-core activities and similar exercises. These arrangements would create synergy concerning referrals of patients for high-end diagnostics as well as tertiary care to Aashka Hospitals. At the same time, associate hospitals will gain from referral income while retaining patients.

Strategic tie-up process:

The typical framework and process followed by us involves identifying the strategic tie-ups based on the criteria set out above, entering into requisite non-disclosure agreements and conducting diligence of the target. On satisfactory conclusion of the diligence exercise, we enter into definitive agreements with the hospitals based on the approval of our management and our Board and the shareholders, if required. As on the date of filing of this prospectus, we have not entered into any definitive agreements with any of the associate hospitals

We will from time to time continue to seek attractive inorganic opportunities that we believe will fit well with our strategic business objectives and growth strategies. Increase in costs, if any, over and above funds earmarked for this object will be made out of internal accruals and / or external borrowings.

Since, we have not identified the associate hospital, we have not applied for any regulatory approvals.

The actual deployment of funds will depend on a number of factors, including the timing, nature, size and number of tie-ups done, as well as general factors affecting our results of operation and financial condition. These factors will also determine the form of investment, i.e., whether they will be directly done by our Company or through joint venture in the form of equity, debt or any other instrument or combination thereof. At this stage, our Company cannot determine whether the form of investment will be cash, equity, debt or any other instrument or combinations thereof.

We plan to expand the capacity and service offerings of our proposed associate hospital to cater to increasing demand. We believe that generally the expenses would be incurred under the following heads:

- a) Civil and Interior work;
- b) Medical Equipment's / Devices and Hospital Furnitures and fixtures;
- c) Contingency

The details of indicative expenses intended to be incurred from the IPO proceeds are as follows:

- a) **Civil and Interior work**

OVERVIEW OF HEALTHCARE INDUSTRY

Introduction

Healthcare has become one of India's largest sector, both in terms of revenue and employment. Healthcare comprises hospitals, medical devices, clinical trials, outsourcing, telemedicine, medical tourism, health insurance and medical equipment. The Indian healthcare sector is growing at a brisk pace due to its strengthening coverage, services and increasing expenditure by public as well private players.

Indian healthcare delivery system is categorized into two major components public and private. The Government, i.e., public healthcare system, comprises limited secondary and tertiary care institutions in key cities and focuses on providing basic healthcare facilities in the form of primary healthcare centres (PHCs) in rural areas. The private sector provides majority of secondary, tertiary, and quaternary care institutions with major concentration in metros and tier I and tier II cities.

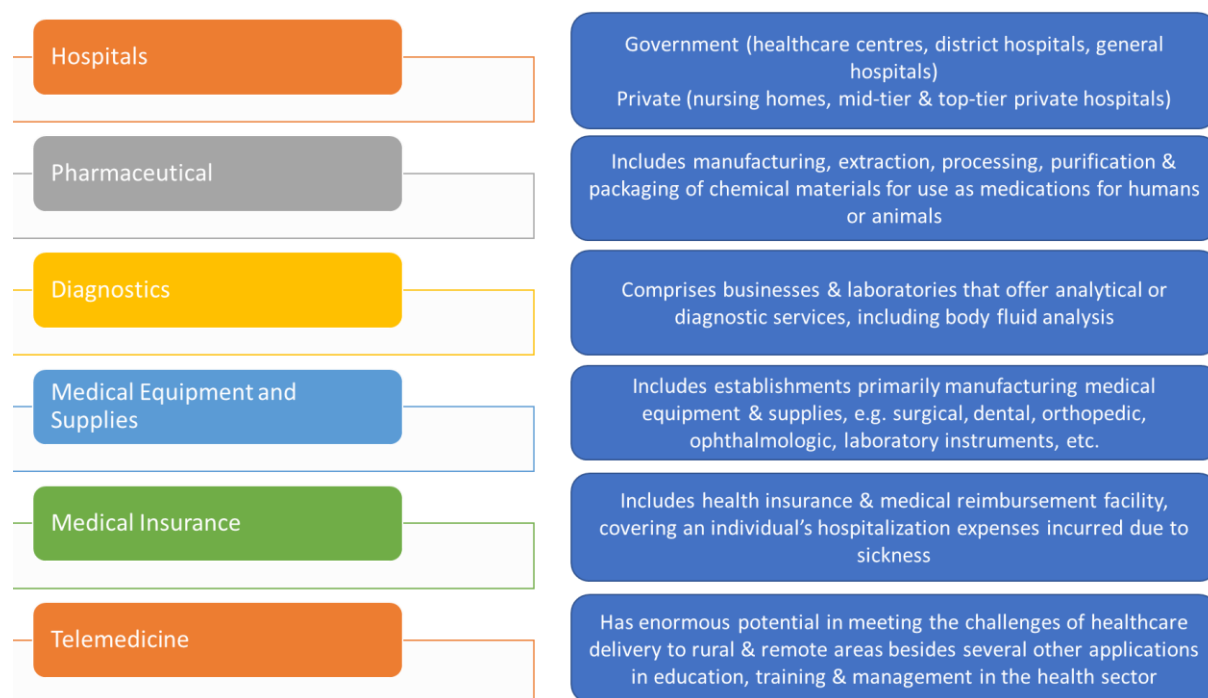

India's competitive advantage lies in its large pool of well-trained medical professionals. India is also cost competitive compared to its peers in Asia and Western countries. The cost of surgery in India is about one-tenth of that in the US or Western Europe.

As of May 04, 2021, >15.89 crore (15,89,32,921) vaccine doses have been administered through 23,35,822 sessions across the country.

Several factors are driving the growth of the Indian healthcare sector including an aging population, a growing middle class, the rising proportion of lifestyle diseases, an increased emphasis on public-private partnerships as well as accelerated adoption of digital technologies, including telemedicine, besides heightened interest from investors and increased FDI inflows over the last two decades.

India's healthcare industry comprises hospitals, medical devices and equipment, health insurance, clinical trials, telemedicine and medical tourism. These market segments are expected to diversify as an ageing population with a growing middle class increasingly favours preventative healthcare. Moreover, the rising

proportion of lifestyle diseases caused by high cholesterol, high blood pressure, obesity, poor diet and alcohol consumption in urban areas is boosting demand for specialised care services.

GROWTH SECTOR

Indian healthcare sector is expected to reach US\$ 193.83 billion by 2020. Rising income level, greater health awareness, increased precedence of lifestyle diseases and improved access to insurance would be the key contributors to growth. Health insurance is gaining momentum in India. Gross direct premium income underwritten by health insurance grew 17.16% y-o-y to Rs. 51,637.84 crore (US\$ 7.39 billion) in FY20. In Budget 2021, India's public expenditure on healthcare stood at 1.2% as a percentage of the GDP.

The Government is planning to increase public health spending to 2.5% of the country's GDP by 2025. The share of healthcare in GDP is expected to rise 19.7% by 2027.

OUR COMPETITIVE STRENGTH

Described below are our competitive strength

1. Well diversified and specialty service offerings.

Our operations encompass various levels of healthcare services from primary to tertiary and position us to be a one-stop destination for patients' needs once they enter our hospital. In addition to providing core medical, surgical and emergency services, we also offer advanced surgical treatments in various specialties, including cardiology, oncology, radiology, neurosciences, paediatrics, gastroenterology, orthopaedics and critical care services. We are investing significantly in the technology, equipment and infrastructure required to perform the most advanced procedures and to strengthen our specialty focus.

2. Provision of quality healthcare services

Since we commenced operations in 2015, we have been focused on providing quality healthcare service. We constantly strive for a high standard of clinical excellence at our hospital. We follow well-defined quality and patient safety protocols in patient handling and care. Further, our hospital offer a wide range of advanced medical care and emergency services, including cardiology, oncology, neurosciences, paediatrics, gastroenterology, orthopaedics, critical care services and allied services such as radiology. Our focus on quality is evidenced by the quality certifications and accreditations that our facility have obtained from various local agencies. Our multi-specialty hospital received accreditation by the NABH.

3. Ability to attract, train and retain quality doctors, consultants and medical support staff

We maintain our standard of quality healthcare by consistently employing a diverse pool of talented doctors, nurses and paramedical professionals. Our multi-disciplinary approach, combined with our cost for treatment, a tertiary care model, has helped us attract and retain high quality doctors and other healthcare professionals. Many of our specialists, physicians and surgeons have been trained in premier medical institutions.

We believe this culture of empowerment and ownership has encouraged learning and training in our hospital, and led to good talent retention and allowed patients to create long-term relationships with our doctors. In a market where demand for physicians and paramedical staff is high and supply is scarce, we meet a portion of our continuing need for quality human resources through the strong academic and learning environment we have created for prospective doctors, nurses and paramedical staff.

4. Experienced player with longstanding presence and brand recall

Although our Company was incorporated in the year 2012, our strong brand equity is evident from the consistent growth in our inpatient and outpatient base and corresponding in our revenues.

We have presence with brand recall in Gujarat and few areas of Rajasthan as well as Madhya Pradesh. We believe that our brand equity and operational experience provides us with the platform to further expand our presence and operations in select locations across the state.

We believe that we have been successful in being a trusted healthcare service provider to our patients which is reflected in the increase in number of revision cases (being patients approaching us after undergoing treatment at other hospitals). We have been one of the preferred hospitals for covid treatment in the state. During this challenging time of pandemic, we have provided treatment for over 2,000 covid patients.

We believe that our brand equity and longstanding presence are as a result of our efforts to preserve and sustain quality human life through facilitation of speedy recovery and indigenization of medical technology

OUR BUSINESS STRATEGY:

1. Move to an asset-light model

We believe that our core competence lies in providing quality healthcare services ranging from primary care to critical care. The healthcare sector is capital intensive and requires a constant source of funds for operations and expansion. We are moving towards an “asset light” model for the delivery of healthcare services, which we believe will enable us to focus on our core healthcare operations and our key medical competencies. Pursuant to this strategy, we will also seek to identify opportunities to expand our network through arrangements and Management Contracts with third parties. We believe that this asset-light model will enable us to pursue attractive opportunities in the healthcare sector, while reducing our capital expenditure commitments to a significant extent.

2. Increasing efficiencies across our healthcare facilities through integration and supply chain management

We strive to maximize efficiencies through the integration of our healthcare facilities and systems developed for this purpose, a patient management system that seeks to enhance patient care services through the establishment of standardized processes and the implementation of performance management methodology. These potential synergies are further aided by the knowhow and we will continue to seek to enhance these synergies and implement streamlined systems and processes across our network

3. Increase outpatient income by focusing on our ongoing day care products and introducing new day care offering.

Over the years, we have established a diverse portfolio of outpatient offerings, including health checkup programs, various forms of laboratory testing, diagnostics (e.g., high end imaging work), and physiotherapy and rehabilitation. Such offerings lead to an increase in outpatient admissions (both

referrals and walk-in patients) at our hospital. We have also recognized the opportunities in day care surgeries. Due to technological developments, certain surgeries, which previously required patients to stay at a hospital for a number of days, can now be carried out as day care surgeries. In such day care surgeries, the patient gets admitted to the hospital in the morning, undergoes the surgery and gets discharged in the evening. Such surgeries reduce the average length of stay for patients and free up bed for tertiary care cases. Going forward, we intend to focus on such procedures at our hospital and we expect this initiative to be a significant contributor to our outpatient income. Due to lifestyle changes and increased awareness for healthcare in India, we also intend to focus on preventative measures for lifestyle diseases and rehabilitative care at our hospital.

4. Attract and retain prominent, skilled doctors

The skill level of a hospital's doctors is key to its success. We believe that hiring surgeons and other physicians who have established reputations for clinical excellence in their communities is the key to the successful implementation of our strategy to acquire, develop and operate hospitals. We shall continue to engage prominent specialist as consultant to provide their expertise to our patients.

5. Strengthen hospital presence

We aim to continue to be one of the leading healthcare service providers in India through strategic acquisitions and O&M arrangements with third party healthcare service providers. Towards this, we intend to strengthen our hospital presence in the state of Gujarat. Every opportunity for expansion is viewed against the background of various factors such as local demography, catchment area served, gentry and spending capacity, growth rate of population, patient flow, availability of local partners, location of the property, expected investment, financial returns, local competition, and the availability of local talent. Expansion of our network of hospitals will be undertaken through a combination strategic acquisitions and O&M arrangements with third party healthcare service providers. We will continue to focus on cities with high growth rate. We currently have presence in Gandhinagar, Gujarat.

In order to foster this sense of community and camaraderie, we also host on site hospital visits for other doctors to give them an opportunity to witness our infrastructure and quality of patient care.

1. The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (Number of Applicants in the Category x Number of Shares applied for).

5. If the Shares allocated on a proportionate basis to any category is more than the Shares allotted to the applicants in that category, the balance available Shares for allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising of applicants applying for the minimum number of Shares.
