We cannot provide any assurance that these matters will be decided in favour of the above-mentioned entities or persons. Further, there is no assurance that legal proceedings will not be initiated against our company, its directors, promoters or group companies in future.

2. We may not be able to successfully identify and acquire suitable land or development rights, which may affect our business and growth prospects

Our ability to identify suitable parcels of land for development is a vital element of growing our business and involves certain risks, including identifying land with clean title and at locations that are preferred by our target customers. We have an internal assessment process for land selection and acquisition. Our internal assessment process is based on information that is available or accessible to us. We cannot assure you that such information is accurate, complete or current, and any decision based on inaccurate, incomplete or outdated information may result in certain risks and liabilities associated with the acquisition of such land, which could adversely affect our business and growth prospects.

In addition, due to the increased demand for land in connection with the development of Residential, commercial and retail properties, we may experience increased competition in our attempt to acquire land in the geographical areas in which we operate and the areas in which we anticipate operating in the future.

We may also be required by applicable laws or court orders to incur expenditures and undertake activities in addition to real estate development on certain portions of our land reserves. Accordingly, our inability to acquire parcels of land or development rights or any restrictions on use of our land or development thereof may adversely affect our business and growth prospects.

3. Any uncertainty in our title to our real estate assets could have a material adverse impact on our current and future revenue.

Some of our projects include directly acquired land from the landowners and tenants. While we conduct due diligence and assess such land prior to acquisition of any land or interest in any land, obtaining title guarantees in India is challenging as title records provide only for presumptive rather than guaranteed title of the land. Such land may involve irregularities in title, such as improperly executed or non-executed, unregistered or insufficiently stamped conveyance instruments in the chain of title of the relevant land, unregistered encumbrances in favour of third parties, rights of adverse possessors, ownership claims of family members of prior owners, and other defects which may not be revealed through our diligence and assessment.

As a result, title to such land is subject to risks and potential liabilities arising from inaccuracy of such information. Such inaccurate information and any defects or irregularities of title may result in the loss of title or development rights over such land, and/ or the cancellation of our development plan in respect of such land. In addition, certain acquisition of or development right to land may involve deferred payments. If we are unable to fulfil such payment obligations, our ability to develop such land may be affected, resulting in a failure to realize profit on our initial investment.

While we typically obtain independent title reports for the land relating to our projects, and have obtained such reports with respect to our Land Reserves, we may not be able to assess or identify all the risks and liabilities associated with such land, such as faulty or disputed title, unregistered encumbrances or adverse possession rights. In addition, very few insurance companies in India provide title insurance to guarantee title or development rights in respect of land. In absence of such title insurance, together with the challenges involved in verifying title to land, may increase our exposure to third party claims to such land. As a result, the uncertainty of title makes land acquisition and real estate development projects more complex and may impede the transfer of title, expose us to legal disputes and adversely affect the valuation of the land involved. In addition, we may also face the risk of illegal encroachments on the land parcels owned by us or over which we have development rights. We may be required to incur additional costs and face delays in our project development schedule in order to clear such encroachments. Disputes relating to land title can take several years and considerable expense to resolve if they become the subject of legal proceedings and their outcome can be uncertain. If we are unable to resolve such disputes, the title to and/ or interest in, such land may be affected. An inability to obtain good title to any plot of land may adversely affect the development of a project for which such plot of land is critical and this may result in the write-off of expenses incurred in relation to such development. As a result, our business, financial condition and results of operations could be materially and adversely affected.

4. Inability to complete our Projects by their respective expected completion dates or at all could have a material adverse effect on our business, results of operations and financial condition.

As of December 31, 2021, our Projects had an aggregate carpet area for sale of 21,24,654 sq.ft. Our ability to complete our projects within the estimated time or at all is subject to a number of risks and unforeseen events, including, without limitation, clear title to the relevant plot of land, any changes in applicable regulations, availability of adequate financing arrangements on commercially viable terms, and an inability or delay in securing necessary statutory or regulatory approvals for such projects.

If any of the foregoing risks materialize, we may not be able to complete our projects or develop our Projects in the manner we currently contemplate, which could have a material adverse effect on our business, results of operations and financial condition. Accordingly, any such delay or cancellation resulting in payments by us may have an adverse effect on our business, financial condition and results of operation.

5. Work stoppages, shortage of labour and other labour problems could adversely affect our business. Further, our operations are dependent on contract labour and an inability to access adequate contract

labour at reasonable costs at our project sites may adversely affect our business prospects and results of operations.

We operate in a labour-intensive industry and hire contract labour is hired by our civil construction contractors for our projects. If the relationships of the independent contractors and their personnel deteriorate, we may experience labour unrest, strikes or other labour action and work stoppages. We depend on third party contractors for the provision of various services associated with our business. Such third-party contractors and their employees/ workmen may also be subject to similar labour legislations. Although we do not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such third-party contractors to pay the labourers wage payments. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition. In addition, under the Contract Labour (Regulation and Abolition) Act, 1970, notified and enforced by the Central Government and adopted with such modifications as may be deemed necessary by respective State Governments, we may be required to absorb a number of such contract labourers as permanent employees. In the event of any non-compliance by contractors with statutory requirements, legal proceedings may also be initiated against us. These factors could adversely affect our business, financial position, results of operations and cash flows.

6. We have significant number of unsold units among our Projects.

As of December 31, 2021, we had Projects with a Developable Area of 21,24,654 sq.ft which remain unsold. There is a lag between the time we acquire land and the time we construct and develop a project and sell our inventories. Given that the market for properties is relatively illiquid, there may be little or insufficient demand for properties at the expected sale price. The risk of owning unsold inventories can be substantial and the market value of the same can fluctuate significantly as a result of changing economic and market conditions. If we are unable to sell our unsold inventory currently held, our business, results of operation and financial condition may be adversely affected.

7. Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.

We have in the past experienced, and may in the future, experience negative operating cash flows. The following table sets forth certain information relating to our cash flows on a standlaone basis for the periods indicated:

Particulars	December 30,2021	March 31, 2021	March 31, 2020	March 31, 2019
Cash Flow from Investing Activities	(1.62)	(96.43)	(11.16)	(8.00)
Cash Flow from Financing Activities	(32.20)	65.95	(12.92)	(3.20)

Our cash flow for any interim period within a fiscal year, such as for the nine month period ended December 31, 2021, is not necessarily indicative of or comparable with our cash flow for any full fiscal year. There can be no assurance that our net cash flows will be positive in the future. Any negative cash flows in the future could adversely affect our results of operations and financial condition, and we cannot assure you that our net cash flows will be positive in the future.

8. We are subject to extensive statutory or governmental regulations, including the Real Estate (Regulation and Development) Act, 2016 (the “RERA”) and change in laws, rules, regulations and legal uncertainties, including the withdrawal of certain benefits or adverse application of tax laws or any non-compliance of any applicable law, may adversely affect our business, prospects and results of operations.

Real estate developers are required to comply with a number of legal requirements, including policies and procedures established and implemented by local authorities in relation to land acquisition, transfer of property, registration and use of land. Certain of these laws vary from state to state. Compliance with such state specific legislations will require significant management and financial resources, and we may need to

allocate additional resources, which may increase our regulatory compliance costs and divert management attention. For example, the procedure for obtaining a certificate for change of land use varies from state to state. In the event that we decide to expand our business operations into such States where these laws are applicable, we will have to comply with these laws. Any non-compliance with state specific legislations in Maharashtra may result in punishments (including penalties and/ or imprisonment), blacklisting of promoter and revocation of registration of our Projects which may have a material and adverse impact on our business, operations and financial condition.

The RERA has imposed certain obligations on real estate developers, including us, such as mandatory registration of real estate projects, not issuing any advertisements or accepting advances unless real estate projects are registered under RERA, maintenance of a separate escrow account for amounts realised from each real estate project and restrictions on withdrawal of amounts from such escrow accounts and taking customer approval for major changes in sanction plan. Further, while most state Governments in India have notified rules in relation to RERA including Maharashtra where all our projects are located. In addition, as the RERA regime has been introduced relatively recently in the May 2017 and was amended in December 2021, we may face challenges in interpreting and complying with the provisions of the RERA due to limited jurisprudence on them. In the event our interpretation of provisions of the RERA differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. For further information on laws applicable to our business, see “*Key Industry Regulations and Policies*” on page 104 of this Draft Prospectus.

9. Our registered office is not owned by us.

Our Registered situated at F-101 Jagat Plaza Law College Square Amravati Road Nagpur, Maharashtra, India is on leave and license agreement upon expiration of the current term on commercially reasonable terms or at all, and may therefore be forced to relocate our affected operations. This could disrupt our operations and result in relocation expenses, which could adversely affect our business, financial condition, results of operations and cash flows. In addition, we may not be able to locate desirable alternative sites for our operations as our business continues to grow or our leases near their end, and failure in relocating our affected operations could adversely affect our business and operations.

Further there are risks associated with the disputes of the property that may also lead to business disruptions. Even where we can extend or renew our leases, our rental payments may increase because of the high demand for the leased properties. Further, in certain case where we must commit to lock-in periods our ability to exit the property may be limited. Further, any unanticipated or steep increase in the regulatory costs on account of stamp duty, municipal taxes or any other local duties, taxes, levies may adversely impact our ability to sustain or expand retail stores marketplace or warehouses in an affordable manner.

10. We have not entered into any definitive agreements to use a portion of the proceeds of the Issue and may invest or spend the proceeds of the Issue in ways with which you may not agree.

As described in the “Objects of the Issue” beginning on page 32, we intend to use a portion of the proceeds from the Issue for the acquisition of land or land development rights. However, as on date of the Draft Prospectus, we have not entered into any definitive agreements and do not have any definite and specific commitments for such acquisitions. As a result, subject to compliance with requirements under the Companies Act and the SEBI ICDR Regulations, our planned use of the proceeds of the Issue may change in ways with which you may not agree. The amount of Net Proceeds identified for acquisitions is based solely on management estimates. The actual deployment of funds will depend on a number of factors, including the location of the parcels, whether they are undivided etc. These are based on current conditions and are subject to change in light of changes in external circumstances or costs or in other financial conditions, business strategy, etc. Further, we may not be able to identify suitable parcels of land in a timely manner to be able to deploy the Net Proceeds as per the timelines stipulated. Furthermore, land acquisition may also

be subject to legal uncertainties and title defects, and we may not be able to capitalize on our acquisitions or ascertain clean and marketable title in a timely manner.

11. We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt.

As on December 31, 2021, our total outstanding indebtedness was 384.65 lakhs.

Our significant indebtedness results in substantial amount of debt service obligations which could lead to :

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- limiting our ability to borrow more money both now and in the future; and
- increasing our interest expenditure and adversely affecting our profitability

12. Significant increases in prices (including for increase in taxes and levies) or shortage of or delay or disruption in supply of, construction materials, contract labour and equipment could adversely affect our estimated construction cost and timelines resulting in cost overruns

Our principal construction materials include steel, cement, ready mix concrete and wood. These materials are sourced from third party vendors. The prices and supply of these and other construction materials depends on factors beyond our control, including general economic conditions, competition, production levels, transportation costs, government taxes and levies, and import duties. Our ability to develop and construct project profitably is dependent on our ability to obtain adequate and timely supply of construction materials within our estimated budget. We do not have long-term agreements with our raw material suppliers and typically procure materials on the basis of purchase orders. If our primary suppliers of construction materials curtail or discontinue their delivery of such materials to us in the quantities we need and at reasonable prices, our ability to meet our material requirements for our projects could be impaired, our construction schedules could be disrupted, and we may not be able to complete our projects as per schedule. Prices of certain building materials are susceptible to increase including for increase in government taxes and levies. During periods of shortage in supply of building material or due to a delay or disruption in supply of building materials, we may not be able to complete our projects as per schedule or at estimated costs. We may also not be able to pass on any increase in the costs incurred for procuring construction materials to our customers, and this could adversely affect our results of operations and impact our financial condition.

We also incur expenses towards project execution that primarily includes employee and contract labour costs, and other subcontractor expenses. The cost and supply of employee and contract labour depend on various factors beyond our control, including general economic conditions, competition and minimum wage rates. For instance, after the sudden announcement of the nationwide lockdown from March 25, 2020, operations at our construction sites were brought to a complete standstill and due to reduced economic activity, workforce deployed at our construction sites returned to their native cities/ towns/ villages. While we subsequently resumed construction activities at all our sites, any such unanticipated events, increases in raw material and labour costs, may impair our ability to meet construction schedules and our business, financial condition and results of operations may be adversely affected.

13. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Key managerial personnel, along with support of our Promoters. We also depend significantly on our Key Managerial Persons for executing our day to day activities. The loss of any of our Promoters and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the

Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section “*Our Management*” on page 111 of this Draft Prospectus.

14. There are certain discrepancies noticed in some of our corporate records relating to forms filed with the Registrar of Companies.

Our Company has made some clerical mistakes in the form filed with Registrar of Companies. In case of any cognizance being taken we may be subjected to penalty in respect of them. Also, there are some cases where forms have not been filed or have been filed belatedly with Registrar of Companies for which requisite delayed fees was paid by the Company. Although no show cause notice have been issued against the Company till date in respect of above, but in case of any such event we may be subjected to penal actions from the concerned authorities for the same.

15. Our business is capital intensive and requires significant expenditure for land acquisition and development.

Development of real estate projects involves significant expenses, a large part of which we fund through unsecured loan. As we intend to pursue a strategy of continued investment in our development activities, we will incur additional expenditure in the current and future fiscal periods. Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows and our capacity to service debt in a rising interest rate environment.

If we do not have access to additional capital, we may be required to delay, postpone or abandon some or all of our projects or reduce capital expenditures and the size of our operations, any of which may adversely affect our business, financial conditions and results of operations.

16. Relevant copies of educational qualifications of some of our Directors and Key Managerial Personnel are not traceable.

Relevant copies of the educational qualifications of Mr. Sachin Gopal Gupta & Rajesh Chaware are not traceable. In accordance with the disclosure requirements brief biographies of the Director and Key Managerial Personnel’s are disclosed in the section entitles “*Our Management*” on page 111 of this Draft Prospectus. However, we have relied on affidavits provided by such Directors and Key Managerial Personal’s.

17. We may not be able to obtain, renew or maintain the requisite permits and approvals in future and this may affect our business and operations

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registrations and permits, some of which we have not applied for or have applied for but have not yet received. These pending approvals required but not obtained includes (i) the registration certificate under the Goods and Services Act, 2017; (ii) registration under the Employees’ State Insurance Act, 1948; (iii) enrolment and registration under Employees' Provident Funds & Miscellaneous Provisions Act, 1952; and (iv) registration as principal employer under the Contract Labour (Regulation and Abolition) Act, 1970.

Failure to obtain, renew or maintain required permits or approvals at the requisite time may result in interruption of our operations and may have an adverse impact on our business, financial condition and results of operations and may also make us liable to certain statutory penalties. As on date, except the approvals stated above, the approvals required for our business are valid and subsisting. For further details of the validity of the approvals and pending approvals, please refer to the chapter "*Government and Other Approvals*" beginning on page 170 of this Draft Prospectus.

However, we cannot assure you that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or

conditions thereof or pursuant to any regulatory action. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us may impede our operations. We may need to apply for further approvals in the future including renewal of approvals that may expire from time to time. There can be no assurance that the relevant authorities will issue such permits or approvals in the timeframe anticipated or at all.

18. We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights

We have not registered nor own any trademarks pertaining to our Company including the trademark "KESAR INDIA" that we use in the course of our business. Our Company has entered into a Partial Assignment Agreement dated April 1, 2022 with Kesar Lands Private Limited ("**Assignor**"), our Group Company, whereby the Assignor has assigned the trademark "KESAR LANDS" (the "**Trademark**") to our Company to use the Trademark in our business projects for a period of 12 months. We may not be able to use the Trademark after the expiry of the period of 12 months post which we may have to renew the Partial Assignment Agreement or enter into a fresh agreement for the assignment of the Trademark.

While we endeavor to ensure that we comply with the intellectual property rights, there can be no assurance that we will not face any intellectual property infringement claims brought by third parties. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims and may divert the efforts and attention of our management away from our business. We could be required to change the name of our Company, pay third party infringement claims or obtain fresh licenses resulting from a name change. The occurrence of any of the foregoing could result in unexpected expenses. For further details please see "*Government and Other Approvals*" beginning on page 170 of this Draft Prospectus.

19. Our business and growth plan could be adversely affected by the incidence and change in the rate of property taxes and stamp duties.

As a real estate development company, we are subject to the property tax in the region we operate. We are also subject to stamp duty for the agreement entered into in respect of the properties we buy and sell. These taxes could increase in the future, and new types of property taxes and stamp duties may be introduced which will increase our overall costs. If these property taxes and stamp duties increase, the cost of buying, selling and owning properties may rise. Additionally, if stamp duties were to be levied on instruments evidencing transactions that we believe are currently not subject to such duties, our acquisition costs and sale values may be affected, resulting in a reduction of our profitability. Any such changes in the incidence or rates of property taxes or stamp duties could have an adverse effect on our financial condition and the results of operations.

20. We may experience difficulties in expanding our business into additional geographical markets.

We may not be able to leverage our experience in existing micro markets to expand our operations in other regions of Nagpur or into other cities, should we decide to further expand our operations. Factors such as competition, culture, regulatory regimes, business practices and customs, customer tastes, behavior and preferences in these regions where we may plan to expand our operations may differ from those in the micro markets where we are currently present, and our experience in such micro markets may not be applicable to other regions. In addition, as we enter new regions, we are likely to compete not only with national developers, but also local developers who have an established local presence, are more familiar with local regulations, business practices and customs, have stronger relationships with local contractors, suppliers, relevant government authorities, and who have access to existing land reserves or are in a stronger financial position than us, all of which may give them a competitive advantage over us.

If we plan to expand our geographical footprint, our business will be exposed to various additional challenges, including adjusting our construction methods to different terrains; obtaining necessary

governmental approvals and building permits under unfamiliar regulatory regimes; identifying and collaborating with local business partners, construction contractors and suppliers with whom we may have no previous working relationship; successfully gauging market conditions in local real estate markets with which we have no previous familiarity; attracting potential customers in a market in which we do not have significant experience or visibility or brand recognition; being susceptible to local taxation in additional geographical areas of India; and adapting our marketing strategy. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations.

21. We may not be able to sustain effective implementation of our business and growth strategy.

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

22. We face significant risks with respect to the length of time needed to complete each project. If we are unable to complete our projects in a timely manner or at all, it would adversely affect our business prospects, financial conditions and results of operations.

It may take several years following the acquisition of land or development rights before income or positive cash flows can be generated through the sale of a completed real estate development project. Generally, the time required to complete any real estate construction and development project is significant. The risk of owning undeveloped land, developed land and inventories can be substantial as the market value of land and inventories can change significantly as a result of changing economic and market conditions. There is a time gap between our acquisition of land or development rights to the land and the development and sale of our projects, during which, deviations if any, could have a material adverse effect due to, among other things, changes to the national, state and local business climate and regulatory environment, local real estate market conditions, perceptions of prospective customers with respect to the convenience and attractiveness of our properties, and changes with respect to competition from other property developments. Since our real estate investments are relatively illiquid, our ability to mitigate the risk of any market fluctuations is limited. We could be adversely affected if the market conditions deteriorate or if we purchase land or inventories at higher prices during stronger economic periods and the value of the land or the inventories subsequently declines during weaker economic periods. We cannot assure you that real estate market cyclicity will not continue to affect the Indian real estate market in the future. As a result, we may experience fluctuations in property values over time which in turn may adversely affect our business, financial condition and results of operations.

23. We rely on various contractors or third parties in developing our projects, and factors affecting the performance of their obligations could adversely affect our projects.

Most of our projects require the services of contractors and various other parties including architects, engineers, consultants and suppliers of labour and materials for our projects. The timing and quality of construction of the projects that we develop depends on the availability and skill of these parties, as well as contingencies affecting them, including labour and construction material shortages and industrial action such as strikes and lockouts. We may not be able to identify appropriately experienced third parties and cannot assure you that skilled third parties will continue to be available at reasonable rates and in the areas in which we undertake our projects, or at all. As a result, we may be required to make additional investments or provide additional services to ensure the adequate performance and delivery of contracted services and any delay in project execution could adversely affect our profitability. Additionally, we rely on suppliers and do not have direct control over the quality of the products they supply, which may adversely affect the construction quality of our developments. In addition, if such contractors or third parties do not complete our orders in a timely manner or match our requirements on quality, our reputation and financial condition

could be adversely affected. Further, any defects in construction of our projects may expose us to the risk of claims for damages.

24. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

25. Non-compliance with, and changes in, safety, health and environmental laws could adversely affect our projects.

We are subject to a broad range of safety, health and environmental laws in the jurisdictions in which we operate in the ordinary course of our business, including on controls on noise emissions, air and water discharges, on the storage, handling, discharge and disposal of chemicals, employee exposure to hazardous substances and other aspects of our operations. Under these laws, owners and operators of property may be liable for the costs of removal or remediation of certain hazardous substances or other regulated materials on or in such property. Although we believe that our projects are generally in compliance with such safety, health and environmental laws, statutory authorities may allege non-compliance and we cannot assure you that we will not be subjected to any such regulatory action in the future, including penalties and other civil or criminal proceedings. Further, though we have been able to obtain the necessary approvals in the past, we cannot assure you that we will be able to obtain approvals in relation to our new projects, at such times or in such form as we may require, or at all. These laws and regulations and their resulting obligations, under which we and our sub-contractors operate, may result in delays in construction and development, cause us to incur substantial compliance and other related costs and prohibit or severely restrict our real estate and construction businesses. If we are unable to continue to deliver products as a result of these restrictions, or if our compliance costs increase substantially, our revenues and earnings may be reduced, which may adversely affect our results of operations, business and financial condition.

26. Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

27. Our Company has borrowed unsecured loans which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows.

Based on restated financial statement, our Company has unsecured loans as at December 31, 2021 amounting to ₹ 89.85 Lakhs from Promoters and members of Promoter Group which are repayable on demand to relevant lenders. These unsecured loans may be re-called at any time by these parties. In the event these loans are required to be re-paid on a short notice, our Company may have to arrange additional fund which may impact our Financials. For further details in relation to the unsecured loans of our Company, please refer to chapter titled “Financial Statements” and “Financial Indebtedness” on page 134 and 164 respectively of the Prospectus.

- 28. There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.**

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above 100 crores. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

- 29. Our development projects may require additional FSI (TDRs) which may not be available or may not be available at the expected price.**

Our development projects like acquired land parcels have inherent FSI as per the DCP Regulations. TDRs granted by the relevant statutory authority provide a mechanism by which a person, who is unable to use the available FSI of his/ her plot for various reasons, is permitted to use the unused FSI on other properties in accordance with applicable regulations or transfer the unused FSI to a third party. This TDRs is available with third parties for a price determined by demand and supply factors. We may be required to acquire TDRs to develop project as per our development plans. If we are unable to acquire TDRs due to non-availability or if the market price of the available TDRs is high or unviable, then this may impact our ability to increase the size of certain projects due to us having insufficient FSI or because of a significant increase in the cost of acquisition of TDRs. Our inability to acquire TDRs may affect our ability to increase the size and scope of our projects which may lead to lower revenues from such projects and our financial condition and results of operations in general.

- 30. Our Promoters and the Promoter Group member will jointly continue to retain majority shareholding in our Company after the Issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.**

Our promoters along with the promoter group members will continue to hold collectively [●]% of the equity share capital of the company. As a result of the same they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholders vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

- 31. There are restrictions on daily movements in the price of the Equity Shares placed by the stock exchanges on which the company is listed, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.**

Once our company gets listed on the stock exchange we would be subject to circuit breakers limits imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges may also change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

- 32. Any future issuance of Equity Shares may dilute the shareholding of the Investor or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.**

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire Post-Issue paid-up share capital, held by our Promoters or other shareholders will be locked-in for a period of 1 (one) year and minimum promoter contribution subject to a minimum of 20% of our post-Issue paid-up capital will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the sub-section titled "Notes to the Capital Structure" under the section titled "*Capital Structure*" beginning on page 61 of the Draft Prospectus. The future issuance or sale of the equity shares of our company by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

33. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by Fixed Price method. The price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled "*Basis for Issue Price*" beginning on page 77 of the Draft Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

34. The stock price may be volatile, and you may be unable to resell your shares at or above the Issue price or at all. Also, there is no existing market for our Equity Shares and we cannot assure you that such a market will develop.

Prior to this Public Issue, there is no public market for the Equity Shares of our company, and an active trading market may not develop or be sustained upon the completion of this Issue. Even though a Market Maker has been appointed for our stock, since there has been no public market for our Company's Equity Shares, an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Issue. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to:

- Volatility in the Indian and Global economy
- Performance of competitors.
- Company's result and performance
- Significant development with respect to the fiscal, political and financial condition in the economy.

The risk of loss associated with this characteristic may be greater for investors expecting to sell Equity Shares purchased in this Issue soon after the Issue.

35. We have in the past entered into related party transactions and may continue to do so in the future.

Our Company has entered into transactions with our certain related parties. While we believe that all such transactions have been conducted on an arm's length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to Chapter titled "*Financial Statement*" on page 134 of this Draft Prospectus.

36. Our funding plans are based on management estimates and there is no assurance that the objects of the Offer will be achieved within the time frame expected or at all, or that the deployment of the Net

Proceeds in the manner intended by us will result in any increase in the value of your investment. Further, the funding plan has not been appraised by any bank or financial institution.

We intend to use the Net Proceeds for the purposes described in the section “*Objects of the Issue*” on page 70 of the Draft Prospectus. The funding plans are in accordance with our own estimates and have not been appraised by any bank, financial institution or any other external agency and are not subject to any monitoring by any independent agency. We may have to revise our management estimates from time to time on account of various factors beyond our control, such as market conditions, competitive environment, costs of commodities and interest or exchange rate fluctuations and consequently its requirements may change.

37. Certain data mentioned in this Prospectus has not been independently verified confined to the data provided by the Company.

We have not independently verified data contained herein also certain data are limited to information provided by the Company and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

External Risk Factors

38. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors’ reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders’ equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

39. The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition. Hostilities, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business,

financial condition and results of operations. Our operations may be adversely affected by fires, natural or man-made disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India or countries to whom we export our products could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

40. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, financial condition and results of operations.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For instance, The Finance Act, 2020 ("Finance Act"), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax ("DDT"), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, the Finance Act, 2019 stipulates any sale, transfer and issue of securities through exchanges, depositories or otherwise to be charged with stamp duty. The Finance Act, 2019 has also clarified that the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. As such, there is no certainty on the impact that the Finance Act, 2019 may have on our Company's business and operations.

Further, the Government of India has announced the union budget for Fiscal 2021, pursuant to which the Finance Act, effective from July 1, 2020, has introduced various amendments. As such, there is no certainty on the impact that the Finance Act, 2020 may have on our business and operations or on the industry in which we operate.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

41. Investors may not be able to enforce a judgment of a foreign court against us.

Our Company is a company incorporated under the laws of India. All our Company's Directors and officers are residents of India and all of our assets are located in India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive

or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered.

42. If inflation were to rise in India, we might not be able to increase the prices of our products at a proportional rate in order to pass costs on to our clients thereby reducing our margins.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our clients, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or entirely offset any increases in costs with increases in prices for our products. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

43. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could impact our business, our future financial performance and the prices of the Equity Shares.

Risk Related to our Equity shares

44. The Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.

The Offer Price of the Equity Shares has been determined by our Company in consultation with the LMs, and through the Fixed Issue Process. This price is based on numerous factors, as described under "*Basis for Offer Price*" on page 77 and may not be indicative of the market price for the Equity Shares after the Offer. The market price of the Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Offer Price.

45. The trading volume and market price of the Equity Shares may be volatile following the Offer.

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;

- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

46. Our Equity Shares have not been publicly traded prior to this Offer. After this Offer, our Equity Shares may experience price and volume fluctuations and an active trading market for our Equity Shares may not develop. Further, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Offer Price, or at all.

Prior to this Offer, there has been no public market for our Equity Shares. An active trading market on the Stock Exchanges may not develop or be sustained after this Offer.

The trading price of our Equity Shares after this Offer may be subject to significant fluctuations in response to factors including general economic, political and social factors, developments in India's fiscal regime, variations in our operating results, volatility in Indian and global securities markets, developments in our business as well as our industry and market perception regarding investments in our business, changes in the estimates of our performance or recommendations by financial analysts, and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. The trading price of our Equity Shares may also decline in reaction to events that affect the entire market and/or other companies in our industry even if these events do not directly affect us and/or are unrelated to our business or operating results.

47. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

48. Foreign investors are subject to foreign investment restrictions under Indian law that limit our ability to attract foreign investors, which may adversely affect the trading price of our Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the requirements specified by the RBI. If the transfer of shares is not in compliance with such requirements or falls under any of the specified exceptions, then prior approval of the RBI will be required. Further, in accordance with press note 3 of 2020, dated April 17, 2020, issued by the Department for Promotion of Industry and Internal Trade, Government of India, the FDI Policy has been recently amended to state that all investments by entities incorporated in a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior

approval of the Government of India. These investment restrictions shall also apply to subscribers of offshore derivative instruments.

In addition, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no-objection or tax clearance certificate from the income tax authority. Additionally, the Indian government may impose foreign exchange restrictions in certain emergency situations, including situations where there are sudden fluctuations in interest rates or exchange rates, where the Indian government experiences extreme difficulty in stabilizing the balance of payments or where there are substantial disturbances in the financial and capital markets in India. These restrictions may require foreign investors to obtain the Indian government's approval before acquiring Indian securities or repatriating the interest or dividends from those securities or the proceeds from the sale of those securities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

49. Investors may have difficulty enforcing foreign judgments against us or our management.

We are a limited liability company incorporated under the laws of India. All our directors and executive officers are residents of India and a majority of our assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon us or such persons outside of India, or to enforce judgments obtained against such parties outside of India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of CPC on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction.

50. You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Capital gains arising from the sale of equity shares within 12 months in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") is paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, is subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares is exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident.

Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares

51. Any future issuance of Equity Shares by us may dilute your shareholding and sales of the equity shares by our Promoter, Promoter Group or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by us may dilute your shareholding in us. In addition, any sales of substantial amounts of the Equity Shares in the public market after the completion of the Issue, including by our Promoter or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could materially impair future ability of us to raise capital through offerings of the Equity Shares. Our Promoter and Promoter Group currently hold an aggregate of 100 % of the outstanding Equity Shares. After the completion of the Issue, our Promoters will continue to hold [●] % of the outstanding Equity Shares. We cannot predict the effect, if any, that the sale of the Equity Shares held by our Promoters or other major shareholders or the availability of these Equity Shares for future sale will have on the market price of the Equity Shares.

52. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.

A public company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offer document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

53. There is no guarantee that our Equity Shares will be listed on the SME Platform of BSE Limited in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until Allotment of Equity Shares pursuant to this Offer. In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the SME Platform of BSE Limited within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

54. The requirements of being a listed company may strain our resources.

We are not a listed company and have historically not been subjected to the compliance requirements and increased scrutiny of our affairs by shareholders, regulators and the public at large associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations or cash flows as promptly as other listed companies.

Further, as a listed company, we will be required to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records

of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

55. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

56. Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as shareholders of an entity in another jurisdiction.

57. There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

Real Estate being driven by policies and growing economy

Economic growth along with growing urbanization is boosting real estate demand

- India's urban population is expected to reach 525 million by 2025, up from an estimated 463 million in 2020.
- Rising income and employment opportunities have led to more urbanisation and more affordability for real estate in cities.

Government Initiatives

Government of India along with the governments of respective States has taken several initiatives to encourage development in the sector. The Smart City Project, with a plan to build 100 smart cities, is a prime opportunity for real estate companies. Below are some of the other major Government initiatives:

- In October 2021, the RBI announced to keep benchmark interest rate unchanged at 4%, giving a major boost to the real estate sector in the country. The low home loan interest rates regime is expected to drive the housing demand and increase sales by 35-40% in the festive season in 2021.

- As of January 31, 2021, India formally approved 425 SEZs, of which 265 were already operational. Most special economic zones (SEZs) are in the IT/ BPM sector.

SEZs emerging as an extension of real estate business

- Exports from SEZs reached Rs. 7.96 lakh crore (US\$ 113.0 billion) in FY20 and grew ~13.6% from Rs. 7.1 lakh crore (US\$ 100.3 billion) in FY19.

Road Ahead

- The Securities and Exchange Board of India (SEBI) has given its approval for the Real Estate Investment Trust (REIT) platform, which will allow all kind of investors to invest in the Indian real estate market. It would create an opportunity worth Rs. 1.25 trillion (US\$ 19.65 billion) in the Indian market in the coming years. Responding to an increasingly well-informed consumer base and bearing in mind the aspect of globalisation, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are also investing in centralised processes to source material and organise manpower and hiring qualified professionals in areas like project management, architecture and engineering.
- The residential sector is expected to grow significantly, with the central government aiming to build 20 million affordable houses in urban areas across the country by 2022, under the ambitious Pradhan Mantri Awas Yojana (PMAY) scheme of the Union Ministry of Housing and Urban Affairs. Expected growth in the number of housing units in urban areas will increase the demand for commercial and retail office space.
- The current shortage of housing in urban areas is estimated to be ~10 million units. An additional 25 million units of affordable housing are required by 2030 to meet the growth in the country's urban population.
- The growing flow of FDI in Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards. Indian real estate is expected to attract a substantial amount of FDI in the next two years with US\$ 8 billion capital infusion by FY22.

Drawdown from such account is permitted for land and construction costs only, in proportion to the percentage of project completion (as certified by an architect, an engineer and a chartered accountant). Further, a promoter can accept only up to 10% of the apartment cost prior to entering into a written agreement for sale with any person. Further, the promoter is prohibited from creating any charge or encumbrance on any apartment after executing an agreement for the same. In the event such charge or encumbrance is created, it will not affect the right and interest of the allottee. Further, the promoter shall not transfer or assign his majority rights and liabilities in respect of a real estate project to a third party without obtaining permission for two-third of the allottees and prior written approval of the Authority. It is required that a promoter obtain all insurances in respect of the real estate projects such as insurance in respect of title of land and construction.

Non-registration of a real estate project as per RERA would result in penalties up to 10% of the estimated cost of the project as determined by the Authority. Contravention of any other provision of RERA or order issues by the Authority may result in penalties up to 5% of estimated cost of the project or imprisonment up to three years or both. Further, the promoter's contravention or failure to comply with any order of the Appellate Tribunal formed under the act will result in imprisonment for a term extending to three years or with a fine further up to 10% of the estimated cost of the project, or both.

Additionally, if the promoter fails to give possession of the apartment, plot or building in accordance with the terms of agreement for sale, or due to discontinuance of business or suspension or revocation of registration under the act, he must return the amount received from the allottee, along with interest and compensation as provided under the act. Any delay in handing over possession would also require the

promoter to pay interest for every month of delay. In case there is a defect in the title of the land due to which the allottees suffer loss, then the promoter is liable to compensate the allottees for such loss.

We are also required to comply with the rules and regulations issued under RERA by the state governments. For instance, Maharashtra has issued the Maharashtra Real Estate (Regulation Development) (Registration of Real Estate Projects).

Phased implementation of Unified Payments Interface

SEBI has issued a **UPI Circulars** in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I:

This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six working days.

Phase II:

This phase commenced on completion of Phase I i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six working days during this phase.

Phase III:

Subsequently, the time duration from public issue closure to listing would be reduced to be three working days. All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government of India has from time to time made policy pronouncements on foreign direct investment ("FDI") through press notes and press releases.

The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, GoI, earlier known as Department of Industrial Policy and Promotion ("DPIIT") has issued the Consolidated FDI Policy Circular of 2020 ("FDI Policy") by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by DPIIT that were in force and effect as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular.

Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India, has also made a similar amendment to the FEMA Rules.
