2. In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We believe that we have obtained all the requisite permits and licenses which are adequate to run our business. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain

licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with by us. For instances, some of our license is in previous name of our Company and we are yet to applied for change in the name of Vruddhi Engineering Works Limited. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

For further details, please refer to Chapters titled “**Key Industry Regulations and Policies**” and “**Government and Other Approvals**” beginning on pages **111** and **186** of this Draft Red Herring Prospectus.

3. We have made an application with the Registrar of Trade Marks for registration of the logos and same has been under the status of send to Vienna Codification. Any delay in receiving the approval and/or granting registration or in obtaining registration could result in loss of logos & brand equity and the Company’s right to use the said logos.

We have applied for the registration of the logos having application number 6018040, 6030308 and 6030506 on July 12, 2023, July 20, 2023 and July 20, 2023 under Class 6 with the Registrar of Trade Mark and the same has been under the status of Send to Vienna Codification.

Our Company logos is not a registered trademark and accordingly, we may not be able to safeguard it from infringement or passing off. In relation to our pending application, third-parties may seek to oppose or otherwise challenge these registrations. As a result, we may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time that this registration is granted.

We cannot assure you that the trademark will finally get registered in the name of the Company. For instance, in the past one our application has been refused by the relevant authority. Any delay in receiving the registration or rejection in processing the application form for registering the logo or in case of any opposition filed against the trademark application, our Company may lose the statutory protection available to it under the Trade Marks Act, 1999 for such trademarks and right to use the said logo which may have an adverse effect on our business.

Further, failure or delay in obtaining the registration of the trademark may make the Company liable to infringement claims of third parties who own and/or use the same or similar trade names/ logo.

For further details, please refer to Chapter titled “**Government and Other Approvals**” beginning on page **186** of this Draft Red Herring Prospectus.

4. Our Company and our Promoter may not have significant experience in the business of our Company

Our Company was incorporated on October 27, 2020 and since then has been engaged in the business of trading in rebar couplers which is used in construction, real estate and infrastructure industry. While we have been able to expand our business over the last 2 years, we may lack sufficient expertise and experience in these products and this may impose additional strain on our resources. Further, our products are used in critical aspect of construction any quality related issue can expose us to litigation and consequent penalties. This may adversely affect our business, results of operation and revenues

5. We are highly dependent on our suppliers for uninterrupted procurement and sale of our traded goods. Any disruption of supply from such entities may affect our business operations.

Our top 10 suppliers 84.03%, 89.47% and 100.00% for the Financial Year ended March 31, 2023, Financial Year ended March 31, 2022 and Financial Year ended March 31, 2021 respectively for procurement and sale of our traded goods such as couplers, reinforcement bars (TMT bars) and machinery. We have not entered into any long-term supply agreement for procurement of such traded goods. In case of any disruption in supply of traded goods from these suppliers/vendors or our procurement of traded goods on terms that are not favorable to us; will adversely affect our operations and financial cost. Further in case our Company is unable to procure the requisite quantities of traded goods well in time and at competitive prices due to volatility in the prices of raw materials, the performance of our Company may be affected, thus adversely affecting our business, prospects, results of operations and financial condition.

Our Company has also entered into third-party manufacturing arrangements for procurement of rebar couplers based on our quality and technical specifications. We are subject to various risks associated with the third-party manufacturers such as interruptions to the operations of third-party manufacturers, failure by our third-party manufacturers to comply with applicable law, insufficient quality controls, any inability on our part to renew arrangement with or find replacements for existing third-party manufacturers, etc. Any disruption or inefficiencies in the supply chain network may adversely affect our business and results of operations

We have not entered into any formal agreement with our suppliers, and hence we cannot be assured that all our traded goods requirements will continue to be met by the suppliers. Our inability to obtain high quality traded goods in a timely and cost-effective manner would cause delays in delivery schedules, which may result in us losing some customers and hence could lead to reduction in revenues. Hence, we also face market risks for each of these products.

6. *We have availed unsecured loans which are repayable on demand. Any demand for repayment of such unsecured loans, may adversely affect our cash flows.*

As on March 31, 2023, we have unsecured loans amounting to ₹22.56 lakhs as per our Restated Financial Statements from our Directors, which are repayable on demand to the relevant lender. Further, these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our Company, see “*Restated Financial Statements*” on page 141 of this Draft Red Herring Prospectus.

7. *We do not own registered office, corporate office and the godown which is used by us currently.*

Our Registered Office and Corporate office are situated at Office No 602/603, 6th Floor, Cello-The Plaza, V P Road, Vile Parle West, Mumbai-400056. The registered office and Corporate Office are not owned by us. Our company has taken premises on lease basis and has entered into lease agreement with Parekh Vipul Kantilal and Parekh Hemant Kantilal. The premises have been taken by us on lease for a period of 36 months commencing from October 15, 2021. There can be no assurance that the term of the agreements will be either continued or renewed for further period, and in such event the lessor/licensor terminates or does not renew the agreements, we may require to vacate the registered office and corporate office and identify alternative premises and enter into fresh lease or leave and license agreement. Such a situation could result in loss of business, time overruns and may adversely affect our operations and profitability and Brand image also.

Further, the premises used by us as our godown is being used in terms of Leave and Licence Agreement dated May 11, 2023. In the event, the permission to use and/or Leave and Licence Agreement under which we occupy the aforementioned premises or certain terms and conditions that are unfavorable to us are imposed on us in relation to the afore referred to premises, or if we are otherwise unable to occupy such premises, we may suffer a disruption in our operations, which could have an adverse effect on our business and financial results

8. *Our operations are significantly located in and around Mumbai and failure to expand our operations may restrict our growth and adversely affect our growth.*

Currently, our office is situated in Mumbai and we are carrying our business mainly with market players from Mumbai itself. Our revenue from sale of our products contributed 82.67% of our revenue from operations for the Financial Year ended March 31, 2023. Hence, our major part of revenues is generated from operations in this region only. In the event that demand for our products and services in general reduces or stops due to any reason including political discord or instability or change in policies of State, then our financial condition and operating results may be materially and adversely affected. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus, we face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating region could impact our future revenues.

9. *Changes in technology may affect our business by making our equipment or products less competitive or obsolete.*

We believe that the construction industry is evolving rapidly both in terms of products and also in terms of quality. Our future success will depend in part on our ability to respond to technological advances and emerging construction industry standards and practices on a cost-effective and timely basis. Changes in customers’ preferences, regulatory or industry requirements, or competitive technologies may render certain of our products obsolete or less attractive. If we are unable to adapt in a timely manner to changing market conditions, customer requirements or technological changes, our business, financial performance and the trading price of our Equity Shares could be adversely affected.

10. *Our insurance policies do not cover all risks, specifically risks like loss of profits, terrorism, etc. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.*

Our Company has obtained insurance coverage in respect of certain risks. While we believe that we do maintain insurance coverage in adequate amounts consistent with the size of our business, our insurance policies do not cover all risks. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected. For further details, please refer to chapter titled ‘*Business Overview*’ beginning on page 97 of the Draft Red Herring Prospectus.

11. *We are subject to strict quality requirements and are consequently required to incur significant expenses to maintain our product quality. Any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.*

We supply rebar couplers which we procure from third-party manufacture based on the quality and specification provided by us. Given the nature of our products and the sector in which we operate, our customers have high and exacting standards for product quality as well as delivery schedules. Adherence to quality standards is a critical factor in our manufacturing process as any defects

in the products manufactured by our Company or failure to comply with the technical specifications of our customers regarding the size and length may lead to cancellation of the orders placed by our customers. Further, any failure to make timely deliveries of products in the desired quantity as per our customers' requirements could also result in the cancellation of orders placed by our customers and may adversely affect our reputation and goodwill. In addition, our customers may demand, among others, price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, change their outsourcing strategy by moving more work in-house, or replace their existing products with alternative products, any of which may have an adverse effect on our business, cash flows, results of operations and financial condition.

12. *Our trading activities is exposed to fluctuations in the prices of traded products. Increase in costs of our traded product could have a material adverse effect on our Company's sales, profitability and results of operations.*

Our Company is dependent on third party suppliers for procuring traded goods. We are exposed to fluctuations in the prices of these traded goods as well as its unavailability, particularly as we typically do not enter into any long-term supply agreements with our suppliers and our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure the materials. We also face the risks associated with compensating for or passing on such increase in our traded goods on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations. Though we enjoy favourable terms from the suppliers both in prices as well as in supplies, our inability to obtain high quality materials in a timely and cost-effective manner would cause delays in our production and delivery schedules, which may result in the loss of our customers and revenues.

Our Company has not entered into any long-term contracts with most of its customers and we typically operate on the basis of orders. Inability to maintain regular order flow would adversely impact our revenues and profitability.

Our Company has had long standing business relationships with various customers and have been supplying our products to several customers including repeat orders received from them. A substantial number of our customers are big brands engaged in varied industry segments like engineering, infrastructure, construction, automobiles, etc. However, we have not entered into any fixed contracts with these customers and we cater to them on an order -by-order basis. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, quality consistency, fluctuation in demand for our Company's products and customer's inventory management.

Although we place a strong emphasis on quality, pricing and timely delivery of our products and after sales service such as feedback on the trends in their market, personal interaction by the top management with the customers, etc., in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition.

13. *Our Company has incurred losses in the previous Fiscals.*

Our Company has incurred losses of ₹ (0.88) lakhs during the Fiscal 2021, being the first year of operation. While we have since made profit, our past loss may not be perceived positively by external parties such as customers, bankers, suppliers etc., which may affect our credibility and business operations. Further, we cannot assure you that we would not incur loss in the future.

14. *All of our product verticals are extremely competitive segments and we face risk of competition affecting our margins and profitability as we scale our operations.*

Our purchase and sales models include various intermediaries who may connect with our competitors and share details of the specialties of our products or our sourcing processes etc. We may not be able to protect our trade secrets and may not be able to detect the same as well. We have not entered into any non-disclosure agreements with our intermediaries and thus our efforts towards marketing of our products may be leaked to other players in the market. This may affect the demand and exclusivity of our products and make us subject to fierce competition thereby adversely affecting our business, financial condition and results of operations.

15. *Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.*

Our business is working capital intensive including fund requirement for payment for purchases of various products across different brands and product verticals. Hence, major portion of our working capital is utilised towards debtors and inventory. Our debtors for the Fiscal 2023 and Fiscal 2022 was approximately 249.12% and 513.18% of the total net worth respectively in each year. Our

inventories for the Fiscal 2023, Fiscal 2022 and Fiscal 2021 was approximately 20.43%, 41.11% and 241.67% of the total net worth respectively in each year.

The results of operations of our business are dependent on our ability to effectively manage our inventory (stock of traded goods) and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. However, if our management misjudges expected customer demand, it could cause either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we purchase, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

We have a sanctioned limit for working capital of ₹ 270 lakhs from the existing bankers / financial institutions. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. In the event we are not able to recover our dues from our trade receivables or sell our inventory, we may not be able to maintain our Sales level and thus adversely affecting our financial health. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled **“Objects of the Issue”** beginning on page 68 of this Draft Red Herring Prospectus.

16. Our company has not complied with certain statutory provisions of the Companies Act, 2013 and other acts. Such non-compliance may attract penalties against our Company which could impact the financial position of us to that extent.

Our Company has not complied with certain statutory provisions under the Companies Act 2013, for instance, our Company has not filed e-form CHG-1 for creation of charge on certain vehicle loans, which is a non-compliance of Section 77 of the Companies Act, 2013. There have been instances where our Company did a late filing of RoC forms for which our Company had to incur late fees. Further, there is an error in filing form 16 for Vedant Mukesh Mehta wherein salary has been mentioned as ₹ 3.24 lakhs instead of ₹ 3.58 lakhs. Further we have at several instances, delayed in filing our GST returns mainly due to timely non -available of populated data in the portal as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes. Although the late filing fees levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no- show cause notice has been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Further we cannot assure you that we may not do delay filings in future and not be subjected to penalty or interest. Further with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

17. Our Company’s Director had not filed Income Tax Return for any Financial Year

Our Company’s Director, i.e., Shivani Kumari Joshi had not filed ITR return for any Financial Year. Although no show cause notice has been issued against Shivani Kumari Joshi till date in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, penal actions may be taken against our member of promoter group.

18. We propose to utilize a portion of the Net Proceeds for funding working capital requirements of our Company

Our Company intends to utilise a portion of the Net Proceeds for funding the working capital requirements of our Company. The detail use of the Net Proceeds towards working capital requirements of our Company have been disclosed in the chapter titled **“Objects of the Issue”** beginning on page 68 of this Draft Red Herring Prospectus. We believe that the working capital will be primarily used for expanding our current business operations. The funding of the working capital requirements of our Company is expected to lead to a consequent increase in our profitability.

19. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus shall be subject to certain compliance requirements, including prior shareholders’ approval.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations. Further, our Promoter would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Offer as prescribed in the SEBI ICDR Regulations.

If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations. For further details of the proposed objects of the Offer, refer chapter titled “*Objects of the Issue*’ beginning on page 68 of this Draft Red Herring Prospectus.

20. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analysis of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

21. *Substantial portion of our revenues has been dependent upon our few customers. The loss of any one or more of our major clients would have a material adverse effect on our business operations and profitability.*

We are a trading company engaged in the sale and distribution of rebar couplers and Steel Products. We sell our products to various industry segments mainly, construction, real estate and infrastructure, at various locations in India. For the financial years ended March 31, 2023, March 31, 2022 and March 31, 2021, our top ten (10) customers accounted for approximately 75.75%, 89.47% and 100% of our total revenue from operations. The loss of a significant customer would have a material adverse effect on our financial results. A significant number of our customers are big companies in their industry having multiple suppliers for their products and we cannot assure you that we can maintain our current levels of business from these customers or that we will be able to replace these customers in case we lose any of them. Also, any attempt to lower our dependence on our top customers, might expose us to credit risks and also affect our logistical set-up that we have with the existing customers. Furthermore, major events affecting our customers, such as bankruptcy, change of management and business framework, mergers and acquisitions, etc. could adversely impact our business. If any of our major customers becomes bankrupt or insolvent, we may lose some or all of our business from that customer and our receivable from that customer would increase and may have to be written off, adversely impacting our income and financial condition.

22. *Our Company has reported certain negative cash flows from its operating activity, investing activity and financing activity, details of which are given below.*

Sustained negative cash flow could impact our growth and business. Our Company had reported certain negative cash flows from our operating activities, investing activities and financing activities in the previous three (3) years as per the restated financial statements and the same are summarised as under:

(₹ in lakhs)

Particulars	As at March 31, 2023	As at March 31, 2022	As at March 31, 2021
Cash flow from Operating Activities	(232.50)	(3.55)	0.62
Cash flow from Investing Activities	(41.80)	(32.73)	-

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

23. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

24. *Delays or defaults in client payments could affect our operations.*

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

In deciding whether to extend credit or enter into other transactions with customers, we rely on information furnished to us by or on behalf of customers. We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the credit worthiness, we do not obtain any independent support from credit information companies or credit bureaus and/or independent valuers in relation to the value of the net worth of such parties. Our reliance on any misleading information given may affect our judgment of credit worthiness of potential customers, which may affect our business, prospects, results of operations and financial condition.

25. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or get manufactured by third parties on our account, we may be required to write-down our inventory or pay our suppliers without new purchases or create additional vendor financing, which could have an adverse impact on our income and cashflows.

26. Any adverse changes in regulations governing our business operations or products or the products of our end-customers, may adversely impact our business, prospects, results of operations and cash flows.

Government regulations and policies of India can affect the demand for and availability of our products. We may incur and expect to continue incurring costs for compliance with such laws and regulations. Any changes in government regulations and policies, such as the withdrawal of or changes in tax benefits, incentives and subsidies, could adversely affect our business, cash flows and results of operations. An adverse change in the regulations governing the development of our products and use of products by our customers may have an adverse impact on our operations.

We cannot assure you that we will be able to comply with such regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for business. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products.

27. Our Promoter and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.

After the issue our promoter along with the promoter group will continue to hold majority of the post Equity share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder's vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

28. We have incurred indebtedness and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition. In addition, certain of our financing agreements involve variable interest rates and an increase in interest rates may adversely affect our results of operations, cash flows and financial condition.

The industry in which we operate is working capital intensive in nature. We have historically financed our working capital requirements mainly through arrangements with banks. The table below provides details of our total financial indebtedness in the relevant periods:

Period	Amounts (₹ in Lakhs)
2023	310.09
2022	6.88
2021	Nil

For further information on our borrowings, see “**Financial Indebtedness**” on page 177.

We propose to fund such expenditure through a combination of debt, equity and internal accruals. Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows and our capacity to service debt in a rising interest rate environment.

The actual amount and timing of our future capital requirements may also differ from estimates as a result of, among other things, change in business plans due to prevailing economic conditions, unanticipated expenses and regulatory changes. To the extent our planned expenditure requirements exceed our available resources, we will be required to seek additional debt or equity financing. We may also have difficulty accessing capital markets, which may make it more difficult or expensive to obtain financing in the future. We may not be successful in obtaining additional funds in a timely manner, or on favourable terms or at all. If we do not have

access to additional capital, we may be required to delay, postpone or abandon or reduce capital expenditures and the size of our operations, any of which may adversely affect our business, financial conditions, cash flows and results of operations.

Our ability to service our indebtedness will depend on our future performance and our ability to generate cash, which, to a certain extent, is subject to general economic, financial, competitive, legislative, legal, regulatory and other factors, many of which are beyond our control. If our future cash flows from operations and other capital resources are insufficient to pay our debt obligations, our contractual obligations, or to fund our other liquidity needs, we may be forced to sell our assets or attempt to restructure or refinance our existing indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets and our financial condition at such time. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments may restrict us from adopting some of these alternatives.

As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows, and financial condition

29. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, please refer to the Chapter titled ***“Dividend Policy”*** beginning on page **140** of this Draft Red Herring Prospectus.

30. *Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency and our management will have broad discretion over the use of the Net Proceeds.*

We intend to utilize the Net Proceeds of the Offer as set forth in ***“Objects of the Issue”*** beginning on page **68** of this Draft Red Herring Prospectus. The funding requirements mentioned as a part of the objects of the Offer are based on internal management estimates in view of past expenditures and have not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, business initiatives, other financial conditions or business strategies and since we have not presently entered into any definitive agreements for the use of Net Proceeds. Various risks and uncertainties, including those set forth in this chapter, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. For example, we may also use funds for future businesses and products which may have risks significantly different from what we currently face or may expect. Accordingly, use of the Net Proceeds for other purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of our business and your investment. For further details, please see ***“Objects of the Issue”*** beginning on page **68** of this Draft Red Herring Prospectus

31. *Our success depends largely upon the services of our Directors, Promoter and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.*

Our success is substantially dependent on the expertise and services of our Directors, Promoter and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key ***members*** could have an adverse effect on our business and the results of our operations.

32. *We have not commissioned an industry report for the disclosures made in the chapter titled ‘Industry Overview’ and made disclosures on the basis of publicly available data and such data has not been independently verified by us.*

We have not commissioned an industry report for the disclosures made in the chapter titled ***‘Industry Overview’*** beginning of page **85** and made disclosures on the basis of publicly available data and such data has not been independently verified by us. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Red Herring Prospectus. Further, the industry data mentioned in this Draft Red Herring Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Red Herring Prospectus in this context.

33. *Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

34. *Our Promoter, Directors and Key Management Personnel may have interests in us other than reimbursement of expenses incurred and normal remuneration or benefits.*

Our Promoter may be interested in our Company to the extent of the Equity Shares held by them in our Company, and any dividends, bonuses or other distributions on such Equity Shares. For details of shareholding of our Promoter in our Company, see **“Capital Structure –Details of shareholding of our Promoter and members of the Promoter Group in our Company”** on page 59 of this Draft Red Herring Prospectus. For details on such unsecured loan and/or deposits, see **“Restated Financial Statements”** on page 141 of this Draft Red Herring Prospectus. Our Promoter and Executive Directors are also interested to the extent of any related party transactions with our Company. For details on related party transactions, see **“Restated Financial Statements”**. Further, our Directors may be interested in our Company to the extent of their shareholding in our Company. For details of shareholding of our directors in our Company, see **“Our Management - shareholding of Directors in our Company”** on page 121.

35. *We have not identified any alternate source of raising the funds mentioned as our ‘Objects of the Issue’. Any shortfall or delay in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds for working capital cycle or may result in us borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the Company.

36. *Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.*

Our Company is engaged in business of providing learning, training and consultancy services being part of the service sector industry which attracts tax liability such as Goods and Service Tax as per the applicable provisions of Law. However, we have deposited the required returns under various applicable Acts but any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

37. *We have in the past entered into related party transactions and may continue to do so in the future.*

Our Company has entered into transactions with our certain related parties. While all such transactions have been conducted on an arm’s length basis and in the ordinary course of business and in accordance with the relevant provisions of Companies Act and all others applicable laws. There can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. All related party transactions that we may enter into post-listing, will be subject to an approval by our Audit Committee, Board, or Shareholders, as required under the Companies Act and the SEBI Listing Regulations. Such related party transactions in the future or any other future transactions may potentially involve conflicts of interest which may be detrimental to the interest of our Company and we cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, financial condition, results of operations, cash flows and prospects. For details on the transactions entered by us, please refer to Chapter titled **“Restated Financial Statement”** beginning on page 141 of this Draft Red Herring Prospectus

38. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our management and our board of Directors, though it shall be monitored by our Audit Committee.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

For details please refer Chapter titled **“Objects of the Issue”** beginning on page 68 of the Draft Red Herring Prospectus.

39. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or

preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

40. The steel industry is highly cyclical and an increase in steel prices may have an adverse effect on our Company's results of operations.

The steel industry is cyclical in nature. Steel prices fluctuate based on a number of factors, such as the availability and cost of raw material inputs, climatic changes, fluctuations in domestic and international demand and supply of steel and steel products, worldwide production and capacity, fluctuation in the volume of steel imports, transportation costs and protective trade measures, in the economies in which the steel producers sell their products and are sensitive to the trends of particular industries, such as the construction, infrastructure development and transportation, which are among the biggest consumers of steel products. We also face low demand during the monsoon season due to decreased construction activities.

While steel prices have increased in recent years, they have been subject to fluctuation. Low steel prices adversely affect the businesses and results of operations of steel producers generally, including ours, resulting in lower revenue and margins and write downs of finished steel products and raw material inventories. In addition, the volatility, length and nature of business cycles affecting the steel industry have become increasingly unpredictable, and the recurrence of another major downturn in the industry may have a material adverse impact on our business, results of operations, financial condition and prospects.

In addition, substantial decreases in steel prices during periods of economic weakness have not always been balanced by commensurate price increases during periods of economic strength. Any sustained price recovery will most likely require a broad economic recovery, in order to underpin an increase in real demand for steel products by end users.

EXTERNAL RISK FACTORS

41. Our business is dependent on economic growth in India.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

42. An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our operations.

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus and its variants, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition.

43. Financial instability in Indian financial markets could materially and adversely affect our results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

44. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between nonresidents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

45. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

46. Political, economic, legal, tax, operation and other factors that are beyond our control may have an adverse effect on our business and results of operations.

The following external risks may have an adverse impact on our business and results of operations should any of them materialise:

- a) high rates of inflation in India and in countries where we operate our business could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins;
- b) changes in existing laws and regulations in India and in countries where we operate our business;
- c) changes in trade policies, in terms of tariff and non-tariff barriers; and
- d) a slowdown in economic growth or financial instability in India and in countries where we operate our business could adversely affect our business and results of operations.

47. If the rate of Indian price inflation increases, our results of operations and financial condition may be adversely affected.

In recent years, India's wholesale price inflation index has indicated an increasing inflation trend compared to prior periods. An increase in inflation in India could cause a rise in the price of transportation, wages, raw materials or any other expenses. In particular, the prices of raw materials required for fabrication of our products are subject to increase due to a variety of factors beyond our control, including global commodities prices and economic conditions. If this trend continues, we may be unable to reduce our costs or pass our increased costs on to our customers and our results of operations and financial condition may be materially and adversely affected.

48. Any downgrading of India's debt rating by a domestic or international rating agency could have a negative impact on our business.

India's sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of our Equity Shares.

49. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details refer to the Chapter titled "*Key Industry Regulations and Policies*" beginning on page 111 of this Draft Red Herring Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

50. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel

and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other/ adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

Risk Related to our Equity shares

51. The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.

The Issue Price of the Equity Shares has been determined by our Company in consultation with the BRLM, and through the Book Built Issue Process. This price is based on numerous factors, as described under “*Basis for Issue Price*” beginning on page 75 of this Draft Red Herring Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Issue Price.

52. Rights of shareholders under Indian laws may differ to those under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’ rights including in relation to class actions, under Indian law may not be similar to the shareholders’ rights under the laws of other countries or jurisdictions.

53. The trading volume and market price of the Equity Shares may be volatile following the Issue.

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts’ recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

54. Our Equity Shares have not been publicly traded prior to this Issue. After this Issue, our Equity Shares may experience price and volume fluctuations and an active trading market for our Equity Shares may not develop. Further, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.

Prior to this Issue, there has been no public market for our Equity Shares. An active trading market on the Stock Exchanges may not develop or be sustained after this Issue.

The trading price of our Equity Shares after this Issue may be subject to significant fluctuations in response to factors including general economic, political and social factors, developments in India’s fiscal regime, variations in our operating results, volatility in Indian and global securities markets, developments in our business as well as our industry and market perception regarding investments in our business, changes in the estimates of our performance or recommendations by financial analysts, and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. The trading price of our Equity Shares may also decline in reaction to events that affect the entire market and/or other companies in our industry even if these events do not directly affect us and/or are unrelated to our business or operating results.

55. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

56. Foreign investors are subject to foreign investment restrictions under Indian law that limit our ability to attract foreign investors, which may adversely affect the trading price of our Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the requirements specified by the RBI. If the transfer of shares is not in compliance with such requirements or falls under any of the specified exceptions, then prior approval of the RBI will be required. Further, in accordance with press note 3 of 2020, dated April 17, 2020, issued by the Department for Promotion of Industry and Internal Trade, Government of India, the FDI Policy has been recently amended to state that all investments by entities incorporated in a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India. These investment restrictions shall also apply to subscribers of offshore derivative instruments.

In addition, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no-objection or tax clearance certificate from the income tax authority. Additionally, the Indian government may impose foreign exchange restrictions in certain emergency situations, including situations where there are sudden fluctuations in interest rates or exchange rates, where the Indian government experiences extreme difficulty in stabilizing the balance of payments or where there are substantial disturbances in the financial and capital markets in India. These restrictions may require foreign investors to obtain the Indian government's approval before acquiring Indian securities or repatriating the interest or dividends from those securities or the proceeds from the sale of those securities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

57. Investors may have difficulty enforcing foreign judgments against us or our management.

We are a limited liability Company incorporated under the laws of India. All our directors and executive officers are residents of India and a majority of our assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon us or such persons outside of India, or to enforce judgments obtained against such parties outside of India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of CPC on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction.

58. You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Capital gains arising from the sale of equity shares within 12 months in an Indian Company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") is paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, is subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares is exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident.

Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares

59. Any future issuance of Equity Shares by us may dilute your shareholding and sales of the equity shares by our Promoter, Promoter Group or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by us may dilute your shareholding in us. In addition, any sales of substantial amounts of the

Equity Shares in the public market after the completion of the Issue, including by our Promoter or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could materially impair future ability of us to raise capital through offerings of the Equity Shares. After the completion of the Issue, our Promoter will continue to hold 96.34% of the outstanding Equity Shares. We cannot predict the effect, if any, that the sale of the Equity Shares held by our Promoter or other major shareholders or the availability of these Equity Shares for future sale will have on the market price of the Equity Shares.

60. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.

A public Company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offer document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

61. There is no guarantee that our Equity Shares will be listed on BSE SME in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue.

In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the BSE Ltd within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

62. The requirements of being a listed Company may strain our resources.

We are not a listed Company and have historically not been subjected to the compliance requirements and increased scrutiny of our affairs by shareholders, regulators and the public at large associated with being a listed Company. As a listed Company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted Company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations or cash flows as promptly as other listed companies.

Further, as a listed Company, we will be required to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

63. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a Company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

64. Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate

procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a Company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian Company than as shareholders of an entity in another jurisdiction.

65. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

66. There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

- Check eligibility for making a Bid (see section titled “*Issue Procedure*” on page 209 of this Draft Red Herring Prospectus);

- Ensure that the Bid cum Application Form is duly completed as per instructions given in this Draft Red Herring Prospectus and in the Bid cum Application Form;

*As certified by Statutory Auditors, Maheshwari & Co Chartered Accountants pursuant to their certificate dated July 29, 2023

The table below sets forth the key assumptions for our working capital projections:

Particulars	Justification
Inventories	Financial Year 2021 was the first year of operations, since the Company was incorporated on October 27, 2020. The holding levels of inventories was therefore at 102 days. However, the inventory holding days rationalised to 6 days in the Financial Year 2022. The higher inventory days of 12 in Financial Year 2023 is on account of purchase of trading business of M/s Kosmo Ventures, proprietorship firm of our Promoter. Inventory

	levels generally tend to vary depending on the factors such as order and delivery schedules, etc. Hence, we consider the holding period for inventory to stay around 15 days for the Financial Year 2024.
Trade Receivables	Financial Year 2021 was the first year of operations, since the Company was incorporated on October 27, 2020. The holding levels of trade receivables were almost NIL. However, the trade receivables days were at 81 days in the Financial Year 2022 and 147 days in the Financial Year 2023. The trade receivable was also higher on account of acquisition of the business of M/s. Kosmo Ventures, proprietorship firm of our Promoter which is engaged in trading of steel products. Further, the higher trade receivable days is also attributable to higher revenue from operations. We expect the holding level of trade receivable to stay around 130 days for the Financial Year 2024
Trade Payable	The holding levels of trade payable were at 25 days in the Financial Year 2022 and 54 days in in the Financial Year 2023. The holding levels of trade payables increased to 54 days in Financial 2023 due to increase in revenue for operations. We expect the holding level of trade payable to stay around 45 days for the Financial Year 2024

INTRODUCTION

The real estate sector is one of the most globally recognized sectors. It comprises of four sub-sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth in the corporate environment and the demand for office space as well as urban and semi-urban accommodation. The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

In India, the real estate sector is the second-highest employment generator, after the agriculture sector. It is also expected that this sector will incur more non-resident Indian (NRI) investment, both in the short term and the long term.

India's high growth imperative in 2023 and beyond will significantly be driven by major strides in key sectors with infrastructure development being a critical force aiding the progress.

Infrastructure is a key enabler in helping India become a US\$ 26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increase efficiency and costs. Prime Minister Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors.

The government's focus on building infrastructure of the future has been evident given the slew of initiatives launched recently. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector, and has already shown a significant headway.

Infrastructure support to nation's manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical.

The “Smart Cities Mission” and “Housing for All” programmes have benefited from these initiatives. Saudi Arabia seeks to spend up to US\$ 100 billion in India in energy, petrochemicals, refinery, infrastructure, agriculture, minerals, and mining.

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development. In other words, the infrastructure sector acts as a catalyst for India's economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure and construction development projects.

In order to meet India's aim of reaching a US\$ 5 trillion economy by 2025, infrastructure development is the need of the hour. The government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as ‘Make in India’ and the production-linked incentives (PLI) scheme to augment the growth of infrastructure sector. Historically, more than 80% of the country's infrastructure spending has gone toward funding for transportation, electricity, and water& irrigation.

While these sectors still remain the key focus, the government has also started to focus on other sectors as India's environment and demographics are evolving. There is a compelling need for enhanced and improved delivery across the whole infrastructure spectrum, from housing provision to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life, and boost sectoral competitiveness.

MARKET SIZE

By 2040, real estate market will grow to ₹ 65,000 crore (US\$ 9.30 billion) from ₹ 12,000 crore (US\$ 1.72 billion) in 2019. Real estate sector in India is expected to reach US\$ 1 trillion in market size by 2030, up from US\$ 200 billion in 2021 and contribute 13% to the country's GDP by 2025. Retail, hospitality, and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs.

India's real estate sector saw over 1,700 acres of land deals in top eight cities in the first nine months of FY22. Foreign investments in the commercial real estate sector were at US\$ 10.3 billion from 2017-2021. As of February 2022, developers expect demand for office spaces in SEZs to shoot up after the replacement of the existing SEZs act.

As per ICRA estimates, Indian firms are expected to raise >₹ 3.5 trillion (US\$ 48 billion) through infrastructure and real estate investment trusts in 2022, as compared with raised funds worth US\$ 29 billion to date.

The office market in the top eight cities recorded transactions of 22.2 msf from July 2020 to December 2020, whereas new completions were recorded at 17.2 msf in the same period. In terms of share of sectoral occupiers, Information Technology (IT/ITeS) sector dominated with a 41% share in the second half of 2020, followed by BSFI and Manufacturing sectors with 16% each, while Other Services and Co-working sectors recorded 17% and 10%, respectively.

Around 40 million square feet were delivered in India in 2021. It is expected that the country will have a 40% market share in the next 2-3 years. India is expected to deliver 46 million square feet in 2022.

ROAD AHEAD

The Securities and Exchange Board of India (SEBI) has given its approval for the Real Estate Investment Trust (REIT) platform, which will allow all kind of investors to invest in the Indian real estate market. It would create an opportunity worth ₹ 1.25 trillion (US\$ 19.65 billion) in the Indian market in the coming years. Responding to an increasingly well-informed consumer base and bearing in mind the aspect of globalisation, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family-owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are also investing in centralised processes to source material and organise manpower and hiring qualified professionals in areas like project management, architecture and engineering.

The residential sector is expected to grow significantly, with the central government aiming to build 20 million affordable houses in urban areas across the country by 2022, under the ambitious Pradhan Mantri Awas Yojana (PMAY) scheme of the Union Ministry of Housing and Urban Affairs. Expected growth in the number of housing units in urban areas will increase the demand for commercial and retail office space.

The current shortage of housing in urban areas is estimated to be ~10 million units. An additional 25 million units of affordable housing are required by 2030 to meet the growth in the country’s urban population.

The growing flow of FDI in Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards. Indian real estate is expected to attract a substantial amount of FDI in the next two years with US\$ 8 billion capital infusion by FY22.

India has to enhance its infrastructure to reach its 2025 economic growth target of US\$ 5 trillion. India's population growth and economic development requires improved transport infrastructure, including through investments in roads, railways, and aviation, shipping and inland waterways.

The government has also suggested an investment of \$750 billion to strengthen railway infrastructure, and envisioned the Maritime India Vision 2030 which estimates massive investments in world-class infrastructure development at Indian ports.

Global investment and partnerships in infrastructure, such as the India-Japan forum for development in the North East are also indicative of more investments. These initiatives come at a momentous juncture as the country aims for self-reliance in future-ready and sustainable critical infrastructure.

India, it is estimated, needs to invest \$840 billion over the next 15 years into urban infrastructure to meet the needs of its fast-growing population. This investment will only be rational as well as sustainable, if we additionally focus on long-term maintenance and strength of our buildings, bridges, ports and airports.

As a result of digitalisation and opportunities that Tier II and III cities present for economic growth, the divide between metro and non-metros is blurring, moving to the new era of infrastructure growth. Commercial real estate properties have witnessed exponential growth in demand across Tier II & III cities as Information technology and Information technology enabled services and banking financial services and insurance focused organizations are increasingly decentralizing their operations to adapt to the new normal.

The residential sector has witnessed good sales, and launches have also shown signs of an uptick during 2022, total sales in the top-7 cities was projected to exceed 360,000 units in 2022.

Civil Aviation Ministry's "Vision 2040" report states that there will be 190-200 functioning airports in India by 2040. Delhi and Mumbai will have three international airports each, while top 31 Indian cities will have two operational airports each.

220 destinations (airports/heliports/water aerodromes) under UDAN are targeted to be completed by 2026 with 1000 routes to provide air connectivity to unconnected destinations in India.

102 critical projects under the Gati Shakti masterplan worth \$7.67 billion are to be completed by 2024, making 2023 a critical year for effective execution and celerity of completion.

India's Infrastructure forms an integral part of the country's economic ecosystem. There has been a significant shift in the industry that is leading to the development of world-class facilities across the country in the areas of roads, waterways, railways, airports, and ports, among others. The country-wide smart cities programmes have proven to be industry game-changers. Given its critical role in the growth of the nation, the infrastructure sector has experienced a tremendous boom as a result of India's necessity and desire for rapid development. The expansion has been aided by urbanisation and an increase in foreign investment in the sector.

The infrastructure sector has become the biggest focus area for the Government of India. India plans to spend US\$ 1.4 trillion on infrastructure during 2019-23 to have a sustainable development of the country. The Government has suggested investment of ₹ 5,000,000 crore (US\$ 750 billion) for railways infrastructure from 2018-30. India's GDP is expected to grow by 8% over the next three fiscal years, one of the quickest rates among major, developing economies, according to S&P Global Ratings. India and Japan have joined hands for infrastructure development in India's Northeast states and are also setting up an India-Japan Coordination Forum for development of Northeast to undertake strategic infrastructure projects for the region.

India being a developing nation is set to take full advantage of the opportunity for the expansion of the infrastructure sector, and it is reasonable to conclude that India's infrastructure has a bright future ahead of it.

(b) On-site threading services of the couplers

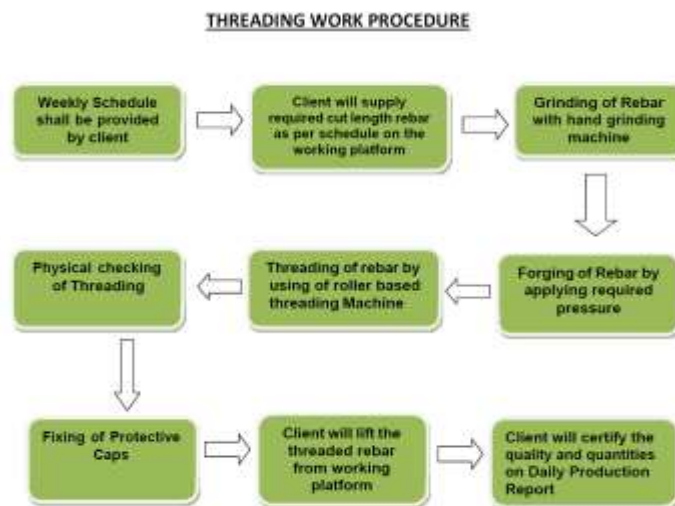

Our Company offers on-site threading service to our customers of the couplers. Our skilled and experienced workforce shall take care of all the hassles associated with on-site machine installation and rebar threading.

Our Company follows the one of the two splicing methods as described herein below:

Cold Forged Couplers (Type A)	Parallel Threaded Couplers (Type B)
-------------------------------	-------------------------------------

It is used when at least one connecting rebar can be rotated. Both the rebars are threaded for half the length of the coupler.		It is used in applications where none of the Re-bar can be rotated. One bar is threaded for full coupler length and the other is threaded for half of coupler length. Typical applications include prefabricated cages, bent bars, and precast structural elements.	
	1. Forging The reinforcing bar is enlarged by cold forging process, thus increasing its diameter		1. Peeling The ribbing at the end of the rebar is peeled
	2. Threading Standard ISO metric threads are then cut onto the enlarged end		2. Threading The peeled end of the rebar is rolled thread as per stand ISO metric
	3. Mechanical Splicing Finally splice the rebar by threaded Vruddhi cold forged coupler		3. Mechanical Splicing Coupler can be used to connect the two rebars

The process we follow in offering our on-site threading services includes

The major plant and machinery of our Company are as follows:

Sr. No.	Name of Major Machinery	Quantity	Purpose
1	Cold Forging Machine / CF 40	2	Forging Service

(c) Trading in imported threading machines and spares.

Our Company is also engaged in trading of threading machines and spares to our existing customers of couplers and also to structural contractors and construction companies. The threading machine that we sell are:

Rebar Cold Forging Machine

Cold forging machines are used for forging of rebars. Cold forging is a process for metal shaping & manufacturing. Rebar Forging Machine consists of Hydraulic cylinder and Power Pack

Cold forged rebars are later threaded and mechanically spliced with cold forged couplers.

Cold forged couplers are widely used in the construction industry. Cold forged couplers are known for providing excellent strength.

Rolled Parallel Threaded

The Rolled Parallel threaded machine is used for parallel threading of re-inforcement bars which are used for application of couplers.

These machines are mobile and easy to use. Further, these machines occupy less space and are best for congested sites.

We believe our low maintenance machines are durable and reliable.

We also trade in spares required for running the above machines.

The carrying values of assets / cash generating units at each balance sheet date are reviewed for impairment if any indication of impairment exists.

funds due to systemic issues faced by Designated Intermediaries / SCSBs and failure to unblock funds in cases of partial allotment / non allotment within prescribed timelines and procedures. Pursuant to the circular dated March 16, 2021, SEBI has prescribed certain mechanisms to ensure proper management of investor issues arising out of the UPI Mechanism, including: (i) identification of a nodal officer by SCSBs for the UPI Mechanism; (ii) delivery of SMS alerts by SCSBs for blocking and unblocking of UPI Mandate Requests; (iii) hosting of a web portal by the Sponsor Bank containing statistical details of mandate blocks / unblocks; (iv) limiting the facility of reinitiating UPI Bids to Syndicate Members to once per Bid / Batch; and (v) mandating SCSBs to ensure that the unblock process for non-allotted / partially allotted applications is completed by the closing hours of one Working Day subsequent to the finalisation of the Basis of Allotment.

SCSBs are required to resolve these complaints within 15 days, failing which the concerned SCSB would have to pay interest at the rate of 15% per annum for any delay beyond this period of 15 days. The following compensation mechanism shall be applicable for investor grievances in relation to Bids made through the UPI Mechanism for public issues, for which the relevant SCSBs shall be liable to compensate the investor:

Scenario	Compensation amount	Compensation period
Delayed unblock for cancelled / withdrawn / deleted applications	₹100 per day or 15% per annum of the Bid Amount, whichever is higher	From the date on which the request for cancellation / withdrawal / deletion is placed on the bidding platform of the Stock Exchanges till the date of actual unblock

The compensation shall be payable for the period ranging from the day on which the investor grievance is received till the date of actual unblock.

Phased implementation of UPI as per the UPI Circulars

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares and convertibles by introducing an alternate payment mechanism using UPI. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by UPI Bidders through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced and implemented the UPI payment mechanism in three phases in the following manner:

(a) Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended until June 30, 2019. Under this phase, an RII also had the option to submit the ASBA Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

(b) Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Under this phase, submission of the physical ASBA Form by a Retail Individual Investor through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

(c) Phase III: The commencement period of Phase III is yet to be notified by SEBI. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Offer.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

The Offer will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Bid/Offer Opening Date. If the Offer is made under UPI Phase III of the UPI Circular, the same will be advertised in all editions of [●] (a widely circulated English national daily newspaper), all editions of [●] (a widely circulated Hindi national daily newspaper) and [●] edition of [●] (a widely circulated Marathi daily newspaper, Marathi being the regional language of Maharashtra, where our Registered Office is located) on or prior to the Bid/ Offer Opening Date and such advertisement shall also be made available to BSE Ltd for the purpose of uploading on their website. All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI.

Our Company will be required to appoint one or more of the SCSBs as a Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders.

The processing fees may be released to the remitter banks (SCSBs) only after an application is made by the SCSBs to the BRLMs with a copy to the Registrar, and such application shall be made only after (i) unblocking of application amounts in the bank accounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB in accordance with circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 issued by SEBI.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%

2,500	20	7,500	250.00%
-------	----	-------	---------

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
