- Our success is dependent on the quality control processes and any failure to maintain the quality of our products may affect our reputation and business.***

We believe that our success is dependent on our quality control processes. Our quality assurance department ensures quality controls at every stage of production, packaging and dispatch. We believe we have built strong relationships with our customers due to the quality of our products which has translated into operational growth. In the event we are unable to maintain our quality control processes,

for any reason whatsoever, our business, reputation and results of operations would be adversely affected.

- 3. Any shortfall in the supply of our raw materials or an increase in raw material costs or other input costs may adversely impact the pricing and supply of our products and have an adverse effect on our business.***

Raw materials and packaging materials are subject to supply disruptions and price volatility caused by various factors, including commodity market fluctuations, the quality and availability of supply of raw materials, foreign currency fluctuations, market demand, changes in government policies and regulatory sanctions. Our raw materials are purchased from third parties and we do not enter into any supply agreements with our suppliers and all raw materials are purchased from our identified suppliers on order to order basis. Our suppliers may be unable to provide us with a sufficient quantity of our raw materials at a suitable price for us to meet the demand for our products. The available amounts of raw materials may not adjust in response to increasing demand in certain circumstances, our suppliers may choose to supply the raw materials to our competitors instead of us. There is a risk that one or more of these existing suppliers could discontinue their operations, which could adversely impact our ability to source raw materials at a suitable price and meet our order requirements till the time we find alternate source for procurement of raw materials. Any increase in raw material prices will result in corresponding increases in our product costs.

We also import our raw materials used in our manufacturing facilities and are subject to risks related to currency fluctuation, global logistics disruptions and other factors. A failure to maintain our required supply of raw materials and equipment could adversely affect our ability to deliver our products to customers in an efficient, reliable and timely manner and adversely affect our business, prospects, financial condition and results of operations.

These are based on our estimates and on third party quotations, which are subject to a number of variables, including possible cost overruns, changes in management’s view of the desirability of current plans, change in supplier, which may have an adverse effect on our business and results of operations. Further, we cannot assure that we would be able to procure these plant and machinery, or procure the same within budgeted costs and timelines. Our inability to maintain relationships with our customers could have an adverse effect on our business, prospects, results of operations and financial condition.***

Any change in the buying pattern of our customers can adversely affect the business of our Company. An accident may result in loss of life, destruction of property or equipment, manufacturing or delivery delays, or may lead to suspension of our operations and / or imposition of liabilities. While we believe we maintain adequate insurance, interruptions in production as a result of an accident may also increase our costs and reduce our revenue, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we or our senior management may become involved in, which may consequently have a negative effect on our profitability, business, financial condition, results of operations and prospects. Any failure to service our indebtedness, perform any condition or covenant or comply with the restrictive covenants could lead to a termination of our credit facilities, acceleration of amounts due under such facilities, affect our ability to raise additional funds or renew maturing borrowings to finance our existing working capital requirements and pursue our growth initiatives. We cannot provide any assurance that our business will generate cash in an amount sufficient to enable us to service our debt or to fund our other liquidity needs as they become due. The termination of, or declaration or enforcement of default under, any financing agreement may have an adverse effect on our business, financial condition, results of operations and prospects. For details of our indebtedness, see "*Financial Indebtedness*" on page 200 of this Prospectus.

Therefore, the deployment of these funds raised through this Issue is at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financial results.

Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

31. *The Companies Act and SEBI Listing Regulations has effected significant changes to the existing Indian Company law framework, which may subject us to higher compliance requirements and increase our compliance costs.*

The Companies Act has been recently notified, except for certain provisions. The Companies Act has brought into effect significant changes to the Indian company law framework, and in certain cases, introduced certain requirements which did not have corresponding provisions under the Companies Act, 1956, such as provisions related to private placement of securities, disclosures in prospectus, corporate governance norms, accounting policies and audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key management personnel from engaging in forward dealing. Accordingly, we may face challenges in interpreting and complying with such provisions due to the limited jurisprudence on them. In the event our interpretation of such provisions of the Companies Act differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps.

To ensure compliance with the requirements of the Companies Act and SEBI Listing Regulations, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

32. *We use third-party transportation providers for all of our product distribution and failure by any of our transportation providers to deliver our products on time or at all could result in loss in sales.*

We use third party transportation providers for the receiving of our raw materials and delivery of our products to domestic and overseas customers. We do not own any transport vehicle or commercial vehicles and typically use third-party logistics providers for all of our product distribution and input materials procurement.

Due to our reliance these logistics providers, factors such as increased transportation costs, issues faced due to bad weather, strikes at the vendor could adversely impact the supply of raw materials that we require and the delivery of our products. In addition, raw materials and products may be lost, delayed or damaged in transit for various reasons including accidents and natural disasters.

Risk related to Equity Shares

33. *There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be

given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

34. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

- Domestic and international economic, legal.

36. *You will not be able to sell immediately on SME Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the SME Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, in the event that the permission of listing the Equity Shares is denied by the Stock Exchange, we are required to refund all monies collected from investors.

37. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

38. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISK FACTORS

39. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

40. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

41. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than twelve (12) months will not be subject to capital gains tax in India if Securities Transaction Tax (“STT”) has been paid on the transaction and also at the time of purchase in certain cases. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than twelve (12)

months, which are sold other than on a recognized stock exchange and on which no STT has been paid to an Indian resident, will be subject to long term capital gains tax in India.

Further, any gain realized on the sale of listed equity shares held for a period of twelve (12) months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

42. *Companies operating in India are subject to a variety of taxes and surcharges.*

Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, value added tax, turnover tax, service tax, stamp duty, tax on dividends and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time. The central or state government may in the future increase the corporate income tax it imposes. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Additional tax exposure could adversely affect our business, cash flows and results of operations.

43. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

44. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

45. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

SECTION III – INTRODUCTION
SUMMARY OF INDUSTRY

INDIAN PHARMACEUTICAL INDUSTRY

Structure of Pharma Sector

Introduction

The Indian pharmaceuticals market is the third largest in terms of volume and thirteenth largest in terms of value, as per a report by Equity Master. India is the largest provider of generic drugs globally with the Indian generics accounting for 20 per cent of global exports in terms of volume. The consolidation has become an important characteristic of the Indian pharmaceutical market as the industry is highly fragmented.

India enjoys an important position in the global pharmaceuticals sector. The country also has a large pool of scientists and engineers who have the potential to steer the industry ahead to an even higher level. Presently over 80 per cent of the antiretroviral drugs used globally to combat AIDS (Acquired Immuno Deficiency Syndrome) are supplied by Indian pharmaceutical firms.

Market Size

The Indian pharma industry, which is expected to grow over 15 per cent per annum between 2015 and 2020, will outperform the global pharma industry, which is set to grow at an annual rate of 5 per cent between the same period. The market is expected to grow to US\$ 55 billion by 2020, thereby emerging as the sixth largest pharmaceutical market globally by absolute size. Branded generics dominate the pharmaceuticals market, constituting nearly 80 per cent of the market share (in terms of revenues).

India's pharmaceutical exports stood at US\$ 16.4 billion in 2016-17 and are expected to grow by 30 per cent over the next three years to reach US\$ 20 billion by 2020, according to the Pharmaceuticals Export Promotion Council of India (PHARMEXCIL).

Indian companies received 55 Abbreviated New Drug Application (ANDA) approvals and 16 tentative approvals from the US Food and Drug Administration (USFDA) in Q1 of 2017. The USFDA approvals are expected to cross 700 ANDA in 2017, thereby recording a year-on-year growth of 17 per cent. The country accounts for around 30 per cent (by volume) and about 10 per cent (value) in the US\$ 70-80 billion US generics market.

Evolution of Indian Pharmaceutical Sector

Revenues Trends

The Indian pharmaceuticals market witnessed growth at a CAGR of 5.64 per cent, during 2011-16, with the market increasing from USD 20.95 billion in 2011 to USD 27.57 billion in 2016. By 2020, India is likely to be among the top 3 pharmaceutical markets by incremental growth & 6th largest market globally in absolute size India's cost of production is significantly lower than that of the US & almost half of that of Europe. It gives a competitive edge to India over others. Increase in the size of middle class households coupled with the improvement in medical infrastructure & increase in the penetration of health insurance in the country will also influence in the growth of pharmaceuticals sector.

Investments

The Union Cabinet has given its nod for the amendment of the existing Foreign Direct Investment (FDI) policy in the pharmaceutical sector in order to allow FDI up to 100 per cent under the automatic route for manufacturing of medical devices subject to certain conditions.

The drugs and pharmaceuticals sector attracted cumulative FDI inflows worth US\$ 14.71 billion between April 2000 and March 2017, according to data released by the DIPP.

Government Initiatives

The implementation of the Goods and Services Tax (GST) is expected to be a game-changer for the Indian Pharmaceuticals industry. It will lead to tax-neutral inter-state transactions between two dealers, thereby reducing the dependency on multiple states and increasing the focus on regional hubs. It is expected to result in an efficient supply chain management, which is expected to reduce its cost considerably. The cost of technology and investment is expected to reduce on account of tax credit which can be availed now on the duties levied on import of costly machinery and equipment.

Some of the initiatives taken by the government to promote the pharmaceutical sector in India are as follows:

- The Government of India unveiled 'Pharma Vision 2020' aimed at making India a global leader in end-to-end drug manufacture. Approval time for new facilities has been reduced to boost investments.
- The government introduced mechanisms such as the Drug Price Control Order and the National Pharmaceutical Pricing Authority to deal with the issue of affordability and availability of medicines.
- The Ministry of Chemicals and Petrochemicals, has announced setting up of chemical hubs across the country, early environment clearances in existing clusters, adequate infrastructure, and establishment of a Central Institute of Chemical Engineering and Technology.

Notable Trends

1. Research and development

Indian pharma companies spend 8-11 per cent of their total turnover on Research & Development. Expenditure on Research & Development is likely to increase due to the introduction of product patents; companies need to develop new drugs to boost sales

2. Export revenue

India's pharmaceutical export market is thriving due to strong presence in the generics space. Pharmaceuticals Exports Promotion Council expects pharma exports exceeded USD 15 billion in 2015 & reached USD 16.89 billion in 2016

3. Joint Ventures

Multinational companies are collaborating with Indian pharma firms to develop new drugs. Cipla formed an exclusive partnership with Serum Institute of India to sell vaccines in South Africa. 6 leading pharmaceutical companies have formed an alliance LAZOR to share their best practices, so as to improve efficiency & reduce operating costs

4. Expansion by Indian players abroad

Cipla, the largest supplier of anti-malarial drugs to Africa, sets up a USD 32 billion plant in Africa for the production of anti-retroviral & anti-malarial drugs

5. Draft Patents (Amendment) Rules, 2015

The time limit given for submitting the application for grant has been reduced to 4 months from 12 months, providing an extension of 2 months.

6. Product Patents

The introduction of product patents in India in 2005 gave a boost to the discovery of new drugs. India reiterated its commitment to IP protection following the introduction of product patents In December 2016, Suven Life Sciences was granted product patent for the treatment of neurodegenerative diseases

7. Less time for approval

In order to compete with global players in pharmaceutical industries, approval process of drugs have been simplified by the authorities & approval time for new facilities has been drastically reduced

Road Ahead

The Indian pharmaceutical market size is expected to grow to US\$ 100 billion by 2025, driven by increasing consumer spending, rapid urbanization, and raising healthcare insurance among others.

Going forward, better growth in domestic sales would also depend on the ability of companies to align their product portfolio towards chronic therapies for diseases such as cardiovascular, anti-diabetes, anti-depressants and anti-cancers that are on the rise.

The Indian government has taken many steps to reduce costs and bring down healthcare expenses. Speedy introduction of generic drugs into the market has remained in focus and is expected to benefit the Indian pharmaceutical companies. In addition, the thrust on rural health programs, lifesaving drugs and preventive vaccines also augurs well for the pharmaceutical companies.

INDIAN PHARMACEUTICAL INDUSTRY

Structure of Pharma Sector

Introduction

The Indian pharmaceuticals market is the third largest in terms of volume and thirteenth largest in terms of value, as per a report by Equity Master. India is the largest provider of generic drugs globally with the Indian generics accounting for 20 per cent of global exports in terms of volume. The consolidation has become an important characteristic of the Indian pharmaceutical market as the industry is highly fragmented.

India enjoys an important position in the global pharmaceuticals sector. The country also has a large pool of scientists and engineers who have the potential to steer the industry ahead to an even higher level. Presently over 80 per cent of the antiretroviral drugs used globally to combat AIDS (Acquired Immuno Deficiency Syndrome) are supplied by Indian pharmaceutical firms.

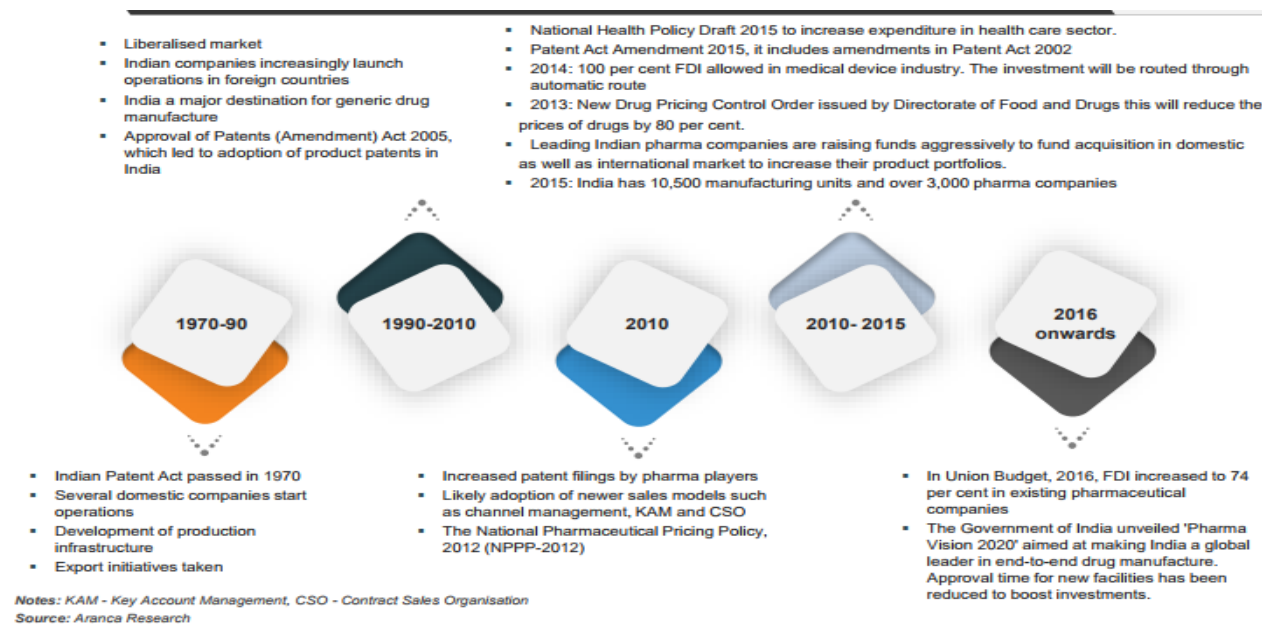

Market Size

The Indian pharma industry, which is expected to grow over 15 per cent per annum between 2015 and 2020, will outperform the global pharma industry, which is set to grow at an annual rate of 5 per cent between the same period. The market is expected to grow to US\$ 55 billion by 2020, thereby emerging as the sixth largest pharmaceutical market globally by absolute size. Branded generics dominate the pharmaceuticals market, constituting nearly 80 per cent of the market share (in terms of revenues).

India's pharmaceutical exports stood at US\$ 16.4 billion in 2016-17 and are expected to grow by 30 per cent over the next three years to reach US\$ 20 billion by 2020, according to the Pharmaceuticals Export Promotion Council of India (PHARMEXCIL).

Indian companies received 55 Abbreviated New Drug Application (ANDA) approvals and 16 tentative approvals from the US Food and Drug Administration (USFDA) in Q1 of 2017. The USFDA approvals are expected to cross 700 ANDA in 2017, thereby recording a year-on-year growth of 17 per cent. The country accounts for around 30 per cent (by volume) and about 10 per cent (value) in the US\$ 70-80 billion US generics market.

Evolution of Indian Pharmaceutical Sector

Revenues Trends

The Indian pharmaceuticals market witnessed growth at a CAGR of 5.64 per cent, during 2011-16, with the market increasing from USD 20.95 billion in 2011 to USD 27.57 billion in 2016. By 2020, India is likely to be among the top 3 pharmaceutical markets by incremental growth & 6th largest market globally in absolute size. India's cost of production is significantly lower than that of the US & almost half of that of Europe. It gives a competitive edge to India over others. Increase in the size of middle class households coupled with the improvement in medical infrastructure & increase in the penetration of health insurance in the country will also influence in the growth of pharmaceuticals sector.

Investments

The Union Cabinet has given its nod for the amendment of the existing Foreign Direct Investment (FDI) policy in the pharmaceutical sector in order to allow FDI up to 100 per cent under the automatic route for manufacturing of medical devices subject to certain conditions.

The drugs and pharmaceuticals sector attracted cumulative FDI inflows worth US\$ 14.71 billion between April 2000 and March 2017, according to data released by the Department of Industrial Policy and Promotion (DIPP).

Government Initiatives

The implementation of the Goods and Services Tax (GST) is expected to be a game-changer for the Indian Pharmaceuticals industry. It will lead to tax-neutral inter-state transactions between two dealers, thereby reducing the dependency on multiple states and increasing the focus on regional hubs. It is expected to result in an efficient supply chain management, which is expected to reduce its cost considerably. The cost of technology and investment is expected to reduce on account of tax credit which can be availed now on the duties levied on import of costly machinery and equipment.

Some of the initiatives taken by the government to promote the pharmaceutical sector in India are as follows:

- The Government of India unveiled 'Pharma Vision 2020' aimed at making India a global leader in end-to-end drug manufacture. Approval time for new facilities has been reduced to boost investments.
- The government introduced mechanisms such as the Drug Price Control Order and the National Pharmaceutical Pricing Authority to deal with the issue of affordability and availability of medicines.
- The Ministry of Chemicals and Petrochemicals, has announced setting up of chemical hubs across the country, early environment clearances in existing clusters, adequate infrastructure, and establishment of a Central Institute of Chemical Engineering and Technology.

Notable Trends

8. Research and development

Indian pharma companies spend 8-11 per cent of their total turnover on Research & Development. Expenditure on Research & Development is likely to increase due to the introduction of product patents; companies need to develop new drugs to boost sales

9. Export revenue

India's pharmaceutical export market is thriving due to strong presence in the generics space. Pharmaceuticals Exports Promotion Council expects pharma exports exceeded USD 15 billion in 2015 & reached USD 16.89 billion in 2016

10. Joint Ventures

Multinational companies are collaborating with Indian pharma firms to develop new drugs. Cipla formed an exclusive partnership with Serum Institute of India to sell vaccines in South Africa. 6 leading pharmaceutical companies have formed an alliance LAZOR to share their best practices, so as to improve efficiency & reduce operating costs

11. Expansion by Indian players abroad

Cipla, the largest supplier of anti-malarial drugs to Africa, sets up a USD32 billion plant in Africa for the production of anti-retroviral & anti-malarial drugs

12. Draft Patents (Amendment) Rules, 2015

The time limit given for submitting the application for grant has been reduced to 4 months from 12 months, providing an extension of 2 months

13. Product Patents

The introduction of product patents in India in 2005 gave a boost to the discovery of new drugs. India reiterated its commitment to IP protection following the introduction of product patents In December 2016, Suven Life Sciences was granted product patent for the treatment of neurodegenerative diseases

14. Less time for approval

In order to compete with global players in pharmaceutical industries, approval process of drugs have been simplified by the authorities & approval time for new facilities has been drastically reduced

Road Ahead

The Indian pharmaceutical market size is expected to grow to US\$ 100 billion by 2025, driven by increasing consumer spending, rapid urbanization, and raising healthcare insurance among others.

Going forward, better growth in domestic sales would also depend on the ability of companies to align their product portfolio towards chronic therapies for diseases such as such as cardiovascular, anti-diabetes, anti-depressants and anti-cancers that are on the rise.

The Indian government has taken many steps to reduce costs and bring down healthcare expenses. Speedy introduction of generic drugs into the market has remained in focus and is expected to benefit the Indian pharmaceutical companies. In addition, the thrust on rural health programs, lifesaving drugs and preventive vaccines also augurs well for the pharmaceutical companies.

GLOBAL VIEW

Introduction

For India, three external developments are of significant consequence:

In the short run, the change in the outlook for global interest rates as a result of the US elections and the implied change in expectations of US fiscal and monetary policy will impact on India's capital flows and exchange rates. Markets are factoring in a regime change in advanced countries, especially US macroeconomic policy, with high expectations of fiscal stimulus and unwavering exit from unconventional monetary policies. The end of the 20-year bond rally and end to the corset of deflation and deflationary expectations are within sight.

Second, the medium-term political outlook for globalisation and in particular for the world's "political carrying capacity for globalisation" may have changed in the wake of recent developments. In the short run a strong dollar and declining competitiveness might exacerbate the lure of protectionist policies. These follow on ongoing trends documented widely about stagnant or declining trade at the global level. This changed outlook will affect India's export and growth prospects.

Third, developments in the US, especially the rise of the dollar, will have implications for China's currency and currency policy. If China is able to successfully re-balance its economy, the spillover effects on India and the rest of the world will be positive. On, the other hand, further declines in the yuan, even if dollar-induced, could interact with underlying vulnerabilities to create disruptions in China that could have negative spill over for India. For China, there are at least two difficult balancing acts with respect to the currency.

Domestically, a declining currency (and credit expansion) prop up the economy in the short run but delay rebalancing while also adding to the medium term challenges. Internationally, allowing the currency to weaken in response to capital flight risks creating trade frictions but imposing capital controls discourages FDI and undermines China's ambitions to establish the yuan as a reserve currency. China with its underlying vulnerabilities remains the country to watch for its potential to unsettle the global economy.

Global Economic Overview

The external position appears robust having successfully weathered the sizeable redemption of Foreign Currency Non-Resident (FCNR) deposits in late 2016, and the volatility associated with the US election and demonetisation. The current account deficit has declined to reach about 0.3 percent of GDP in the first half of FY2017. Foreign exchange reserves are at comfortable levels, having risen from around US\$350 billion at the end of January 2016 to US\$ 360 billion at the end of December 2016 and are well above standard norms for reserve adequacy. In part, surging net FDI inflows, which grew from 1.7 percent of GDP in FY2016 to 3.2 percent of GDP in the second quarter of FY2017, helped the balance-of-payments.

The trade deficit declined by 23.5 per cent in April-December 2016 over corresponding period of previous year. During the first half of the fiscal year, the main factor was the contraction in imports, which was far steeper than the fall in exports. But during October- December, both exports and imports started a long-awaited recovery, growing at an average rate of more than 5 per cent. The improvement in exports appears to be linked to improvements in the world economy, led by better growth in the US and Germany. On the import side, the advantage on account of benign international oil prices has receded and is likely to exercise upward pressure on the import bill in the short to medium term.

Meanwhile, the net services surplus declined in the first half, as software service exports slowed and financial service exports declined. Net private remittances declined by \$4.5 bn in the first half of 2016- 17 compared to the same period of 2015-16, weighed down by the lagged effects of the oil price decline, which affected inflows from the Gulf region

GLOBAL VIEW FOR GROWTH

Central Statistics Office (CSO) in its first Advance Estimation (AE) estimated the economy to grow by 7.1 per cent in the current year. However, it has stated that these numbers have been projected taking into account the information for first seven to eight months. It is therefore unlikely to have captured the impact of withdrawal of the high denomination currency. Although it is difficult to precisely pinpoint the impact on GDP, in all likelihood, the growth numbers of GDP, GVA, etc. could be revised downwards in the subsequent revisions to be carried out by the CSO. Inflation could also be lower than what comes out from the implicit GDP deflator underlying the CSO's first AE for 2016-17.

For 2017-18, it is expected that the growth would return to normal as the new currency notes in required quantities come back into circulation and as follow up actions to demonetisation are taken. Helping to maintain the momentum of such growth will be factors like possible normal monsoon, an increase in the level of exports following the projected increase in global growth and above all various reform measures taken by the Government to strengthen the economy. Some possible challenges to growth exist. For example, the prices of crude oil have started rising and are projected to increase further in the next year. Estimates suggest that oil prices could rise by as much as one sixth over the 2016-17 level, which could have some dampening impact on the growth. Fixed investment rate in the economy has consistently declined in the past few years, more so the private investment. Raising the growth rate of the economy will to a great extent depend on quickly reversing this downward trend in the investment. The last few years have also witnessed a slowdown in global trade and investment flows.

Although, India has not been particularly affected by this slowdown, lower growth in foreign portfolio investment cannot be ruled out, partly on account of the fact that the interest rates in the United States have begun to increase. On balance, there is a strong likelihood that Indian economy may recover back to a growth of 6¾ per cent to 7½ per cent in 2017-18.

INDIAN ECONOMY AT A GLANCE

Overview of the Indian Economy

With demonetisation, a radical governance-cum-social engineering measure was enacted on November 8, 2016. The two largest denomination notes, Rs 500 and Rs 1000 together comprising 86 percent of all the cash in circulation were “demonetised” with immediate effect, ceasing to be legal tender except for a few specified purposes. These notes were to be deposited in the banks by December 30, while restrictions were placed on cash withdrawals. In other words, restrictions were placed on the convertibility of domestic money and bank deposits.

The aim of the action was fourfold:-

- to curb corruption,
- counterfeiting,
- the use of high denomination notes for terrorist activities, and
- especially the accumulation of “black money”, generated by income that has not been declared to the tax authorities

Review of Developments in 2016 -17

The Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Real GDP growth in the first half of the year was 7.2 percent, on the weaker side of the 7.0-7.75 per cent projection in the Economic Survey 2015-16 and somewhat lower than the 7.6 percent rate recorded in the second half of 2015-16 (Figure 1a). The main problem was fixed investment, which declined sharply as stressed balance sheets in the corporate sector continued to take a toll on firms’ spending plans. On the positive side, the economy was buoyed by government consumption, as the 7th Pay Commission salary recommendations were implemented, and by the long-awaited start of an export recovery as demand in advanced countries began to accelerate. Nominal GDP growth recovered to respectable levels, reversing the sharp and worrisome dip that had occurred in the first half of 2015-16 (Figure 1b).

The major highlights of the sectoral growth outcome of the first half of 2016-17 were:

- (i) moderation in industrial and non-government service sectors;
- (ii) the modest pick-up in agricultural growth on the back of improved monsoon; and
- (iii) strong growth in public administration and defence services dampeners on and catalysts to growth almost balancing each other and producing a real Gross Value Addition (GVA) growth (7.2 per cent), quite similar to the one (7.1 per cent) in H2 2015-16 (Figure 1a).

Inflation this year has been characterized by two distinctive features as shown in Figure 2.

- (i) The Consumer Price Index (CPI) - New Series inflation, which averaged 4.9 per cent during April-December 2016, has displayed a downward trend since July when it became apparent that kharif agricultural production in general, and pulses in particular would be bountiful.
- (ii) The decline in pulses prices has contributed substantially to the decline in CPI inflation which reached 3.4 percent at the end of December. The second distinctive feature has been the reversal of WPI inflation, from a trough of (-) 5.1 percent in August 2015 to 3.4 percent at the end of December 2016 as shown in Figure 2, on the back of rising international oil prices.

Figure 1b. GVA and GDP Growth (Current Prices)

Figure 2. WPI and CPI Inflation

The wedge between CPI and WPI inflation, which had serious implications for the measurement of GDP has narrowed considerably. Core inflation has, however, been more stable, hovering around 4.5 percent to 5 percent for the year so far. The outlook for the year as a whole is for CPI inflation to be below the RBI's target of 5 percent, a trend likely to be assisted by demonetisation

products, fertilizers, steel, cement and electricity that have a total weight of nearly 38 per cent in the IIP registered a cumulative growth of 4.9 per cent during April-November, 2016-17 as compared to 2.5 per cent during April-November, 2015-16.

The production of refinery products, fertilizers, steel, electricity and cement increased substantially, while the production of crude oil and natural gas fell during April-November, 2016-17. Coal production attained lower growth during the same period.

Outlook for Growth

The growth in 2017-18, we need to examine each of the components of aggregate demand: exports, consumption, private investment and government. India's exports appear to be recovering, based on an uptick in global economic activity. This is expected to continue in the aftermath of the US elections and expectations of a fiscal stimulus. The IMF's January update of its World Economic Outlook forecast is projecting an increase in global growth from 3.1 percent in 2016 to 3.4 percent in 2017, with a corresponding increase in growth for advanced economies from 1.6 percent to 1.9 percent. Given the high elasticity of Indian real export growth to global GDP, exports could contribute to higher growth next year, by as much as 1 percentage point.

The outlook for private consumption is less clear. International oil prices are expected to be about 10-15 percent higher in 2017 compared to 2016, which would create a drag of about 0.5 percentage points.

On the other hand, consumption is expected to receive a boost from two sources: catch-up after the demonetisation-induced reduction in the last two quarters of 2016-17; and cheaper borrowing costs, which are likely to be lower in 2017 than 2016 by as much as 75 to 100 basis points. As a result, spending on

As per the first advance estimates of the CSO, growth rate of the industrial sector comprising mining & quarrying, manufacturing, electricity and construction is projected to decline from 7.4 per cent in 2015-16 to 5.2 per cent in 2016-17. During April - November 2016-17, a modest growth of 0.4 per cent has been observed in the Index of Industrial Production (IIP) which is a volume index with base year of 2004-05. This was the composite effect of a strong growth in electricity generation and moderation in mining and manufacturing. In terms of use-based classification, basic goods, intermediate goods and consumer durable goods attained moderate growth.

Conversely, the production of capital goods declined steeply and consumer nondurable goods sectors suffered a modest contraction during April-November 2016-17. The eight core infrastructure supportive industries, viz. coal, crude oil, natural gas, refinery

housing and consumer durables and semi durables could rise smartly. It is too early to predict prospects for the monsoon in 2017 and hence agricultural production. But the higher is agricultural growth this year, the less likely that there would be an extra boost to GDP growth next year.

Since no clear progress is yet visible in tackling the twin balance sheet problem, private investment is unlikely to recover significantly from the levels of FY2017. Some of this weakness could be offset through higher public investment, but that would depend on the stance of fiscal policy next year, which has to balance the short-term requirements of an economy recovering from demonetisation against the medium-term necessity of adhering to fiscal discipline and the need to be seen as doing so.

Putting these factors together, we expect real GDP growth to be in the 6¾ to 7½ percent range in FY2018. Even under this forecast, India would remain the fastest growing major economy in the world.

There are three main downside risks to the forecast.

First, the extent to which the effects of demonetisation could linger into next year, especially if uncertainty remains on the policy response. Currency shortages also affect supplies of certain agricultural products, especially milk (where procurement has been low), sugar (where cane availability and drought in the southern states will restrict production), and potatoes and onions (where sowings have been low). Vigilance is essential to prevent other agricultural products becoming in 2017-18 what pulses was in 2015-16.

Second, geopolitics could take oil prices up further than forecast. The ability of shale oil production to respond quickly should contain the risks of a sharp increase, but even if prices rose merely to \$60-65/barrel the Indian economy would nonetheless be affected by way of reduced consumption; less room for public investment; and lower corporate margins, further denting private investment. The scope for monetary easing might also narrow, if higher oil prices stoked inflationary pressure.

Third, there are risks from the possible eruption of trade tensions amongst the major countries, triggered by geo-politics or currency movements. This could reduce global growth and trigger capital flight from emerging markets.

The one significant upside possibility is a strong rebound in global demand and hence in India's exports. There are some nascent signs of that in the last two quarters. A strong export recovery would have broader spill over effects to investment.

INTELLECTUAL PROPERTY LAWS

Intellectual Property in India enjoys protection under both common law and statute. Under statute, India provides for patent protection under the Patents Act, 1970, copyright protection under the Copyright Act, 1957, trademark protection under the Trade Marks Act, 1999 and design protection under the Designs Act, 2000. The above enactments provide for protection of intellectual property by imposing civil and criminal liability for infringement.

The Trademarks Act, 1999

In India, trademarks enjoy protection under both statutory and common law. Indian trademark law permits the registration of trademarks for goods and services. The Trademarks Act governs the statutory protection of trademarks and for the prevention of the use of fraudulent marks in India. Certification marks and collective marks can also be registered under the Trademarks Act. An application for trademark registration may be made by individual or joint applicants by any person claiming to be the proprietor of a trade mark, and can be made on the basis of either use or intention to use a trademark in the future. Applications for a trademark registration may be made for in one or more international classes. Once granted, trademark registration is valid for ten years unless cancelled. If not renewed after ten years, the mark lapses and the registration has to be restored. While both registered and unregistered trademarks are protected under Indian Law, the registration of trademarks offers significant advantages to the registered owner, particularly with respect to proving infringement. The Trademark (Amendment) Act, 2010 has been enacted by the Government of India to amend the Trademarks Act to enable Indian nationals as well as foreign nationals to secure simultaneous protection of trademark in other countries, and to empower the Registrar of Trademarks to do so. It also seeks to simplify the law relating to transfer of ownership of trademarks by assignment or transmission and to bring the law generally in line with international practice.

The restated summary statements have been prepared to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013 (“the Act”) read with Rule 7 of the Companies (Accounts) Rules, 2014 and other relevant provisions of the Act to the extent notified and applicable. The restated summary statements have been prepared on a going concern and accrual basis. The accounting policies have been consistently applied by the Company unless otherwise stated.

These restated summary statements have been prepared to comply with the requirements of section 26 of the Companies Act, 2013, read with Rules 4 of Companies (Prospectus and Allotment of Securities) Rules, 2014 and the SEBI ICDR Regulations, as amended (‘the Regulations’).

The audited Financial Statements for year ended March 31, 2017, 2016 and 2015 have been prepared in accordance with Schedule III of the Companies Act, 2013 and for the financial years ended on March 31, 2014, and 2013 in accordance with Revised Schedule VI of the Companies Act, 1956. For the purpose of inclusion in the offer document, audited financial statements are prepared in accordance with Schedule III of the Companies Act, 2013. The adoption of Schedule III of the Companies Act, 2013 do not impact recognition and measurement principles followed for preparation of financial statements.

The financial statements have been prepared to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) rules, 2014 and other relevant provisions of the Act to the extent notified and applicable. The financial statements have been prepared on a going concern and accrual basis. The accounting policies have been consistently applied by the Company and are consistent with those used in the previous years.

These Restated Summary Statements have been prepared after incorporating:

- (i) Appropriate adjustments have been made in the Restated Summary Statements, wherever required, by regrouping of the corresponding items of income, expenses, assets and liabilities, in order to bring them in line with those as per the audited financials of the Company for the year ended March 31, 2017.

b. Use of estimates:

The preparation of financial statements requires the management to make estimates and assumptions in the reported amounts of assets and liabilities (including current liabilities) as of the date of the financial statements and the reported income and expenses during the reporting period. Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ from these estimates.

c. Property, Plant and Equipment and Depreciation/Amortization:

All Property, Plant and Equipment are at cost of acquisition less depreciation/amortization.

With the applicability of Companies Act, 2013 with effect from April 1, 2014, depreciation / amortization is provided on the Written Down Value Method, pro-rata to the period of use of assets, based on the useful lives as specified in Part C of Schedule II to the Companies Act, 2013.

Due to the same, there has been a change in the estimated useful life of depreciable tangible assets which affects the depreciation in the F.Y. 2014-15 and in each period during the remaining useful life of the assets. As the change is only in regards to an accounting estimate requiring an adjustment of the carrying amount of tangible assets, the same does not require adjustment in the financial information for the years ended on March 31, 2014 and 2013.

Depreciation on additions to Property, Plant and Equipment has been provided on a pro-rata basis from the date of such additions.

d. Events after Reporting Period:

The Board of Directors of the Company have proposed issue of Bonus Shares in the ratio of 5:1 vide its resolution dated 29th July 2017, which is subject to approval of the shareholder in the AGM for increase in authorised capital to be held on 19th August 2017.

A qualifying asset is an asset that necessarily takes substantial period of time to get ready for its intended use. Other borrowing costs are recognised as an expense in the period in which they are incurred. No borrowing costs were eligible for capitalization during the respective years.

f. Inventories:

Inventories are valued at cost or net realizable value whichever is lower. Cost is arrived at on the basis of weighted average method and includes applicable production overheads.

g. Investments:

The carrying amount is reduced to the recoverable amount and the reduction is recognized as an impairment loss in the Statement of Profit and Loss.

For the same, a provision has been made on the basis of an actuarial valuation as at the end of the each year.

5.6 BASIS OF ALLOCATION

- The SEBI ICDR Regulations specify the allocation or Allotment that may be made to various categories of Applicants in an Issue depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the Prospectus. For details in relation to allocation, the Applicant may refer to the Prospectus.
- Under-subscription in any category (except QIB Category) is allowed to be met with spillover from any other category or combination of categories at the discretion of the Issuer and in consultation with the LM and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- In case of under subscription in the Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Applicants may refer to the Prospectus.
- Illustration of the Book Building and Price Discovery Process Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs. 20 to Rs 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors

Bid Quantity	Bid Amount	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%

2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer in consultation with the LM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below Rs. 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Alternate Method of Book Building

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the Prospectus or advertise the Floor Price at least one Working Day prior to the Bid/ Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the website of the Stock Exchange at least one day prior to the Bid/ Issue Opening Date. In a fixed price Issue, allocation in the net Issue to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

For details of instructions in relation to the Application Form, Applicants may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The Allotment of Equity Shares to Applicants other than Retail Individual Investors and Anchor Investors may be on proportionate basis. For Basis of Allotment to Anchor Investors, Applicants may refer to Prospectus. No Retail Individual Investor will be Allotted less than the minimum Bid Lot subject to

availability of shares in Retail Individual Investor Category and the remaining available shares, if any will be Allotted on a proportionate basis. The Issuer is required to receive a minimum subscription of 90% of the Issue (excluding any Issue for Sale of specified securities). However, in case the Issue is in the nature of Offer for Sale only, then minimum subscription may not be applicable

ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIIs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“**Maximum RII Allotees**”). The Allotment to the RIIs will then be made in the following manner:

- In the event the number of RIIs who have submitted valid Bids in the Issue is equal to or less than Maximum RII Allotees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- In the event the number of RIIs who have submitted valid Bids in the Issue is more than Maximum RII Allotees, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

ALLOTMENT TO NIIs

Bids received from NIIs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIIs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Applicants may refer to the SEBI ICDR Regulations or Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Issue Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with

other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

1. Allocation of Equity Shares to Anchor Investors at the Anchor Investor Issue Price will be at the discretion of the issuer in consultation with the Investor, LM, subject to compliance with the following requirements:
 - not more than 60% of the QIB Category will be allocated to Anchor Investors;

Based on the physical book and at the discretion of the issuer in consultation with the LM, selected Anchor Investors will be sent a CAN and if required, a revised CAN.
3. **In the event that the Issue Price is higher than the Anchor Investor Issue Price:** Anchor Investors will be sent a revised CAN within one day of the Pricing Date indicating the number of Equity Shares allocated to such Anchor Investor and the pay-in date for payment of the balance amount. Anchor Investors are then required to pay any additional amounts, being the difference between the Issue Price and the Anchor Investor Issue Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors.
4. **In the event the Issue Price is lower than the Anchor Investor Issue Price:** Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- Bidders may be categorized according to the number of Equity Shares applied for;
- The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio

- In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;
- If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
- If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. The balance Equity Shares, if any, remaining after such adjustment may be added to the category comprising Bidders applying for minimum number of Equity Shares

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment related approval are DIPP, RBI and various ministries or their departments.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued Consolidated FDI Policy, which with effect from June 07, 2016 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 07, 2016. The Government proposes to update the consolidated circular on Consolidated FDI Policy once every year and therefore, the Consolidated FDI Policy will be valid until the DIPP issues an updated circular. In terms of the Consolidated FDI Policy, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Consolidated FDI Policy. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current Consolidated FDI Policy, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100% foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore applicable foreign investment up to 100% is permitted in our Company under automatic route.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the DIPP or the RBI or various ministries or their departments, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI. As per the existing policy of the Government of India, OCBs cannot participate in this Issue. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.

The Equity Shares issued in the Issue have not been and will not be registered under the Securities Act or any other laws in the United States of America and may not be issued or sold or offered within the United States of America, or to, or for the account or benefits of “US Persons” as defined in Regulation S of the Securities Act, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable laws.

Accordingly, the Equity Shares are being offered and sold (i) within the United States to persons reasonably believed to be “qualified institutional investors” (as defined in Rule 144A under the Securities Act) pursuant to Rule 144A under the Securities Act or other applicable exemption under

the Securities Act and (ii) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdictions where such offers and sales occur.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Prospectus. Applicants are advised to make their independent investigations and ensure that the Applications are not in violation of laws or regulations applicable to them.

(ii) The Board shall be at liberty to waive payment of any such interest wholly or in part.
17. (i) Any sum which by the terms of issue of a share becomes payable on allotment or at any fixed date, whether on account of the nominal value of the share or by way of premium, shall, for the purposes of these regulations, be deemed to be a call duly made and payable on the date on which by the terms of issue such sum becomes payable.
(ii) In case of non-payment of such sum, all the relevant provisions of these regulations as to payment of interest and expenses, forfeiture or otherwise shall apply as if such sum had become payable by virtue of a call duly made and notified.

 - (b) to make such transfer of the share as the deceased or insolvent member could have made.

26. A person becoming entitled to a share by reason of the death or insolvency of the holder shall be entitled to the same dividends and other advantages to which he would be entitled if he were the registered holder of the share, except that he shall not, before being registered as a member in respect of the share, be entitled in respect of it to exercise any right conferred by membership in relation to meetings of the company:
Provided that the Board may, at any time, give notice requiring any such person to elect either to be registered himself or to transfer the share, and if the notice is not complied with within ninety days, the Board may thereafter withhold payment of all dividends, bonuses or other monies payable in respect of the share, until the requirements of the notice have been complied with.

Forfeiture of shares

27. If a member fails to pay any call, or installment of a call, on the day appointed for payment thereof, the Board may, at any time thereafter during such time as any part of the call or installment remains unpaid, serve a notice on him requiring payment of so much of the call or installment as is unpaid, together with any interest which may have accrued.

30. (i) A forfeited share may be sold or otherwise disposed of on such terms and in such manner as the Board thinks fit.
(ii) At any time before a sale or disposal as aforesaid, the Board may cancel the forfeiture on such terms as it thinks fit.
31. (a) the holders of stock may transfer the same or any part thereof in the same manner as, and subject to the same regulations under which, the shares from which the stock arose might before the conversion have been transferred, or as near thereto as circumstances admit:

Provided that the Board may, from time to time, fix the minimum amount of stock transferable, so, however, that such minimum shall not exceed the nominal amount of the shares from which the stock arose.

(b) the holders of stock shall, according to the amount of stock held by them, have the same rights, privileges and advantages as regards dividends, voting at meetings of the company, and other matters, as if they held the shares from which the stock arose; but no such privilege or advantage (except participation in the dividends and profits of the company and in the assets on winding up) shall be conferred by an amount of stock which would not, if existing in shares, have conferred that privilege or advantage.

(c) such of the regulations of the company as are applicable to paid-up shares shall apply to stock and the words "share" and "shareholder" in those regulations shall include "stock" and "stockholder" respectively.
